Submission ID: S8B0D45C9

I would like site inspections to be made to:
- Carr Lane BOAT, Ulley. This is a well used pedestrian and equestrian route, with occasional cyclists. I am concerned about the impact on this amenity during construction and after completion of the project. The construction period is likely to impact considerably and I would like to know how the 'traffic management' will work effectively for equestrians and pedestrians without 'pushing us onto roads.
- Stocket Lane, Ulley Bridleway 6. This bridleway is a popular walking and equestrian route. I would like the committee to consider if the applicant has adequately addressed the issues that will arise during the excavation of a cable corridor alongside this popular route.
- A broader consideration of the visual impact to Ulley is of concern and I believe is acknowledged by the developer. I would welcome an accompanied site visit to the land known as Far Croft to illustrate the impact on this neighbourhood.
