Submission ID: S0C66C387

Save Our Bridleways requests that the Examining Authority includes Penny Hill Lane, between Carr Lane and Stoket Lane, within its programme of site inspections for the Whitestone Solar Farm examination.
2.Based on local knowledge, Penny Hill Lane provides the only available route for horse riders travelling between Carr Lane and Stocket Lane. This makes it an important connection within the wider equestrian access network.
3. We request that the Examining Authority inspects the route and its junctions with Carr Lane and Stoket Lane to understand its existing use, physical characteristics, visibility, available passing space and suitability for horses.
4.The Applicant should identify whether construction traffic, access arrangements, temporary restrictions or other proposed works would affect this connection, and explain what measures would maintain safe and continuous equestrian access.
5.If any restriction or diversion is proposed, the Applicant should demonstrate that a lawful, safe and reasonably practicable alternative is available for horse riders. An alternative route shown on a plan should not be assumed suitable without examining its actual conditions.
