Whitestone Solar Farm (EN0110020) – Suggested locations for the accompanied site inspection

Grid references are Ordnance Survey National Grid (OSGB36). Eight-figure references are accurate to about 10 metres and six-figure references to about 100 metres; full easting and northing are in brackets. Where a location is a route, the references mark where to join it and where it ends. All locations can be reached from the public highway or a public right of way unless noted.
