Subject: Ref my previous objection, which still stands.

You don't often get email from [REDACTED]

1. The route through the most densely populated city would cause havoc, chaos and increase air pollution. (We are already the 3rd worst polluted city in the country)
2. Habitats and wild life would be threatened.
3. Toxic materials would be exposed.
4. The fragile marine environment will be affected (the environmental report is over 5 years old.
5. Businesses, A&E, emergency services etc would be affected.
6. The refusal by Ofgem and CRE of the Aquind project because of consumer constraints and indefinite delays.
7. The MOD has expressed serious concerns for National Security. We remain surprised that just that one reason hasn't been sufficient to refuse the application.
8. Inherent risk to Sub sea cables. This has been more apparent in the last couple of years.
9. The Need for UK to focus on home-grown sustainable energy.
10. Objection and refusal in France.
11. Suggestion of bribes to certain politicians who have received monies from Aquind chiefs.

Yours faithfully

P.J. Ellis
