**Subject:** Aquind

Good morning,

I find myself compelled to voice my concerns and objections to the proposed Aquind Interconnector project.

As a plot holder at Milton Piece allotments and resident of Portsmouth, the negatives far outweigh the benefits of this project.

It would see untold destruction to our environment and disruption to an already overpopulated area and exacerbate an already serious pollution problem with the proposed works shutting down the Eastern Road one of only two routes onto Portsea Island.

We have been in limbo now for years and MPs from all political parties representing Portsmouth have spoken out strongly against this project for environmental and security reasons.

It's time to let us get on with our lives without a constant worry that someday soon bulldozers will start destroying our allotments and the important natural environment and wildlife. This Aquind project would be of no benefit to the citizens of Portsmouth and the Country other than to appease business interests of a few oligarchs.

Please STOP Aquind now

Yours sincerely

Robert Milner
