[REDACTED]

I would like to register my strong objection to the plans for Sea Link.

The impact of this project would cause devastating destruction on the Suffolk Coastal area

A nationally designated wildlife site is an inappropriate location for this type of industrial infrastructure and as such should not be considered. Protected nature reserves, such as the RSPB North Warren site should have legal rights under law to protect them against this type of project and its impact on the protected habitats and wildlife.

Kind regards,
Steven Nash
