

# FRISTON PARISH COUNCIL

## NATIONAL GRID ELECTRICITY TRANSMISSION - SEA LINK PROJECT

**FRISTON PARISH COUNCIL - IP NO F4DB2AC56 & SASES - IP NO FD73070EF**

**Date: 8 October 2025**

### **REQUEST FOR ACCOMPANIED SITE INSPECTION – W/C 2 FEBRUARY 2026**

1. FPC & SASES request that the examining authority visits some of the locations of works which are currently being conducted for Scottish Power's EA2 and EA1N projects.
2. The locations of these works are shown on Scottish Power's project activity web pages, screenshots of which are attached. The screenshots show the location of the works and the activity being carried out. The particular activities which the examining authority are requested to visit are shown by the southern green dot on Grove Road near Friston and the blue dots on Snape Road. These activities are for the haul road which will enable the installation of cables and cable ducts for both the EA2 and EA1N projects, which are being constructed simultaneously to mitigate disruption from construction.
3. These works are currently underway and it is believed they will provide some idea of the scale of the impact of cable route construction.
4. These works can be viewed from the public highway and from footpaths although it would be of assistance if Scottish Power were able to provide greater access.

**END**

SCREENSHOTS FROM SCOTTISH POWERS PROJECT ACTIVITY WEBPAGES
