

I wish to understand, as there is great public interest in 2 areas on the materials for consultation. I believe for the public and the scale of the documents and maps, that for many the information is not clear to the public. There has been very little information in the public space and given the interest I wish certainly as a person in my community that local people are able to see and comment on what is a significant proposal.

This can also affect the time lines for comments in digesting the amount of information provided.

We should also consider that proceedings are fully accessible for all people and that certainly in Thanet the age demographic on average is higher than average for older people who may not be able to gain access to a computer or read materials which are large in scale.
