

Please consider the negative impact before these energy projects go ahead and listen to the local residents concerns. Answer the question: Why not consider the alternative offshore option? This resistance to respond smacks of chicanery. The devastation that these projects are creating, and will create in the future, are causing the deepest distress untold difficulties to many, many people. It does not need to be like this. So put your time targets aside and look at the sensible and humane answer to these energy projects, and do not take the route that lines the pockets of the interested companies and financiers, satisfies the Government. Once our heritage coast is destroyed it will be gone forever.
