

As a resident of Thanet who is watching with great sadness as huge swathes of nature in the area are destroyed by developers and industry, I simply wish to implore the people behind this project to find an alternative site which does not have such a devastating effect on nature and wildlife. With environmental destruction going on all over the planet we should all be doing everything we can to prevent losing any more of the precious gift that is the natural world. We should all be able to enjoy it, as people have for hundreds if not thousands of years before us, and we should be protecting it for the benefit of future generations. Please, please reject this proposal.
