

I am very concerned about the proposed Sea Link project for a number of reasons. There will be a really detrimental impact to wildlife including birds, the enormous building will be an eyesore on the beautiful Minster Marshes which I often walk over, which benefits my mental health. There will be increased flooding risk to properties nearby and the value of my house will be decreased. There will be huge disturbance during the construction phase especially if Marsh Farm Road is used as an access route. This road is totally unsuitable for a large volume of traffic and will pose a safety risk to walkers and their dogs, and will also cause congestion in the village on the way to Marsh Farm Road. If this road is closed to the public during the construction phase then that will be a real loss to locals who frequently use it. If the project must go ahead then it should be situated on a Brownfield site.
