

Thank you for giving me the opportunity to speak at the Snape open floor meeting.

I would like to add some additional personal information.

My Wife and I have been residents of Westleton for ten years and previously another ten years in Middleton.

We absolutely love this area which which affords us beautiful walks at Westleton Heath, Dunwich forest and beach, Walberswick, Minsmere,

North Warren and until recently Kenton Hills forest which has now been destroyed by the SZC project.

My wife has serious health issues and we're extremely concerned that our area will be come more fragmented with the proposed Sea Link infrastructures, reducing where we can walk without seeing country side destruction. These infrastructures have caused an unnecessary increase in her stress levels which are already high due to her illness.

Her mental health has an impact on my wellbeing too!

The planning inspections refusal recommendations for SZC were rejected by the Government and EDF sneakily added to their project.

The worry now is what are we not being told by Sea Link and their planning application.

We along with many residents in the local communities would be hopeful that the planning inspectors will take peoples mental health along with the other arguments when making their judgments

Thank you

An extremely worried local resident
