

I wish to object to the absolute shambles that National Grid has not only proposed on marsh land , but their utter failings in adhering to any set procedures . It's a total scandal . They have openly left destroyed farmland whilst doing the so called investigations why because the land is flooded!!!!, a big enough statement in itself to your proposed building of a grid on this totally un appropriate land !! The adjoining harbour where Brett's is accumulating with the help on this council absolute tonnes of aggregate with dust and pollution no doubt to do with this project , for you the grid to pump untold amounts of concrete to build the grid on it .Several findings are coming to light how this is in fact not going to save the public money but cost us more until 2031 and beyond and Thanet ? Thanet is going to bear the brunt of your total anihilation of the Marsh land its habitat lost forever. Its evidently quite clearly not the land this should be built on !!!!For what? a net climate that makes no bloody difference when the rest of the world is still using gas and oil !!!!This is totally going to cost more just like the HS2 train bollocks that has wasted millions of tax payers money , by a few greedy profiteers for their own kudos and pockets . And what's with the absolute stupid list of have your written anything about crime or children that rubbish !!! This is the public objecting to you destroying land , ruining any wildlife we have left because face it the rivers have been poisoned and destroyed around here , fish dead , swans dead and this is something that the taxpayer will have to shell even more for because you can't even see how you cant build on water loggged land , pumping it full of concrete [REDACTED] that will leach out into the land for years . Noise and disturbance and years of misery for you to claim "" oh net zero "" lies lies and more lies.
