

The proposed developments/ infrastructure is completely unacceptable in this rural area.

With the Sizewell C site now going ahead the local rural and tourist area is overwhelmed by roadworks. The A roads are too small to cope with the traffic and the minor roads are completely inadequate for diversions. If the National Grid proposals go ahead the heavy goods vehicles needed to deliver this project will overwhelm the area.

Cumulative disruption needs to be seriously considered.

The project should be processed off shore and delivered to brown field sites. It shouldn't be delivered via AONB sites, Nature reserves, SSI's and Heritage coast.
