

I am writing this response as a resident of Suffolk. I am affected by all elements of the sea link project and in response to the Applicants Thematic response to my Relevant Representation - REP1-166.

The scale of the projects involved will have a direct impact on our way of life and the countryside along our coast. The pollution and environmental impact is too great for an area granted a 'Heritage site'. The devastation of ancient woodland and felling of ancient oak is heartbreaking and unnesscary. Our roads are unable to cope with the additional traffic and as a consequence of the construction and roads, our vital tourism will be affected negatively.

I hope that a more realistic solution can be found before Suffolk is ruined.
