

The applicant refuses to properly explore offshore options.

Refuses to acknowledge the cumulative impact of the industrialisation of Suffolk Coastal with its ecologically sensitive area's causing yet more loss of habitat for our wildlife leading to unacceptable damage to our ecology and landscape. The project will massively impact on tourism and agriculture which this area relies on economically. It will alter the character and communities for ever causing both physical health and mental health problems.

The applicant has said nothing to change my view on this application, they continually minimise the effect this will have on Suffolk Coastal and ignore the needs of local people.

I am totally opposed to this project as it stands and urge The Examining Authority to refuse consent. I am urging you to compel the applicant to explore offshore options which are after all the common sense option.
