

The project is fundamentally flawed. My significant concerns cover a wide spectrum of issues, including: loss of farmland, long-term noise and air pollution, ecological damage, increased flood risk, severe traffic impacts, and harm to the local tourism economy and landscape. Crucially, the Applicant consistently downplays these impacts, bases their case on assumptions instead of evidence, and provides no guaranteed community benefits. This proposal will permanently degrade the environment and quality of life for local communities, and the Applicant has failed to adequately justify the scale of harm proposed.
