Dear Sir/Madam,

Sea Link Energy Cable

The following constitutes Natural England's formal statutory response for Examination Deadline 3.

1. Natural England's Deadline 3 Submissions

An update of Natural England's position and advice in relation to documents relevant to our remit is provided in the following Appendices listed below.

Natural England highlights that a very large volume of complex material has been submitted in both the pre-Examination period and at subsequent deadlines. Further, a considerable proportion of this material has been amended and/or superseded by subsequent submissions. This is making document review and advice formulation exceptionally challenging. Unfortunately, as a result Natural England has not been able to conclude our review of all the documentation submitted in time for our Deadline 3 response. Consequently, our aim is to respond to any Deadline 1A and Deadline 2 submissions, relevant to our remit, at Deadline 4.

A full list of documents reviewed for each thematic area is included below in Annex 1 and also listed within each Appendix for detailed comments.

The Appendices submitted at Deadline 3 are as follows:

- EN020026_533355_Sea Link Energy Cable Appendix A3 – Natural England’s Advice on Suffolk Onshore Ecology – Deadline 3.pdf
- EN020026 533355 Sea Link Energy Cable Appendix B3 - Natural England’s Advice on Kent Onshore – Deadline 3.pdf (including Annex 1: Standard Advice for Air Quality Impacts in Nationally Significant Infrastructure Projects (NSIPs))
- EN020026_533355_Sea Link Energy Cable Appendix D3 – Natural England’s Marine Physical Environment Advice on the Applicant’s Pre-deadline 1 and Deadline 1 Documents – Deadline 3.pdf
- EN020026_533355_Sea Link Energy Cable Appendix F3 – Natural England’s Advice on Marine Mammals – Deadline 3.pdf
- EN020026 533355 Sea Link Energy Cable Appendix H3 - Natural England's Advice on Suffolk LVIA- Deadline 3

Natural England also aims to provide further advice on submissions up to and including Deadline 1A regarding offshore ornithology, benthic ecology, intertidal ecology relating to the Kent landfall, and the Development Consent Order (DCO) by either Deadline 3A (19th January) and no later than Deadline 4 (10th February 2026).

2. Risk & Issues Log at Deadline 3

Please note that owing to the volume of documents received prior to and at Deadline 1, we have not fully concluded our review to be able to meaningfully update our Risk & Issues Log for this deadline. However, we will provide an update to the Risk & Issues Log at Deadline 3A, following the conclusion of the review and submission of further advice.

3. Principal Areas of Disagreement Summary Statement (PADSS)

As part of our Risk and Issues log, Natural England highlights that we are aiming to provide a further update to the PADSS by either Deadline 3A (19th January) and no later than Deadline 4 (10th February 2026).

4. Natural England has identified an error in their most recent Deadline 2 covering letter submission.

Please note in our covering letter submitted at Deadline 2 the PINS reference number was transposed.

Natural England stated:

REP1-098	9.53 Statement of Common Ground Between National Grid Electricity Transmission and EDF Nuclear Generation Limited	Natural England has no comments to make on this document.
----------	---	---

Natural England should have stated:

REP1-089	9.53 Statement of Common Ground Between National Grid Electricity Transmission and EDF Nuclear Generation Limited	Natural England has no comments to make on this document.
----------	---	---

5. Examining Authority's Written Questions 1 (ExQ1) [PD-017]

Natural England regrets that owing to the large volume of change request, pre-Deadline 1, and Deadline 1 and other documents submitted by the Applicant into Examination, we have been unable to finalise our response to the ExQ1 in time for Deadline 3. Our aim is, instead, to submit our response to ExQ1 at Deadline 4 which will also provide relevant signposting to our written submissions.

6. Attendance at Issue Specific Hearings.

Natural England's approach to hearing attendance is set out in the cover letter of our Deadline 1 response [REP1-153], where we stated that hearing attendance is by exception and targets those ISHs that have the greatest likelihood of resolving environmental risks. We will continue to carefully consider the merits of attending each round of ISH, but at this stage we consider that until there is further information provided and then reviewed, we will not be in a position to progress many of the outstanding issues by the time of the January ISH. However, Natural England would be pleased to respond to any questions from the ExA that arise from the ISH at a subsequent deadline.

For any queries relating to the content of this letter please contact me using the details Provided below.

Yours faithfully

Sustainable Development, East Midlands Area Team
