

FRISTON PARISH COUNCIL

NATIONAL GRID ELECTRICITY TRANSMISSION - SEA LINK PROJECT

FRISTON PARISH COUNCIL - [REDACTED] & SASES - [REDACTED]

Date: 11 JANUARY 2026

DEADLINE 3 – RESPONSES TO ExQ1

ExQ 1GEN1 – neither Friston Parish Council nor SASES have used artificial intelligence (AI) to create or alter any part of their documents, information or data.

ExQ 1GEN11 – FPC and SASES thank examining authority for asking this question. They would point out that in order to ensure the existing mitigation for the National Grid connection hub/substation is maintained, the content of outline documents that are certified and secured in the EA2 and EA1N is carried forward into the Sealink project. As the ExA is aware of the detail of many of these documents is currently being agreed under a discharge of requirements process which is proving very onerous. In the interests of efficiency every effort should be made to avoid “reinventing the wheel” in respect of the mitigation already determined for the National Grid connection hub/substation.
