

Having had difficulty navigating through documents on my phone I chose to use this space to pass comment on the revised hover port access at pegwell bay. As a regular user of the hover port for dog walking and recreational activities I am strongly against any construction activities that will hamper my and any other like minded individuals use of this area. It has fought hard to become a rewilded area with minimal help from humankind yet when some company feels it needs to it will apply to destroy it for their convenience and not care how or who is impacted in the process this includes users of the hover pad, viking cafe and green, the cycle path to sandwich and the residents with traffic noise, and the resulting dirt and fumes and let's not forget the silent majority. That is the flora and fauna that makes the area it's home. This is a plea from the heart as having tried to understand the gobbledegook presented in the documents and coming up short. I plead as a member of the public that this application for change be disallowed. Thankyou
