

I cannot believe that NG want to destroy such an important area as Pegwell Bay (where many people walk to be amongst beautiful wildlife and relax) Hoverport (which has taken 40 years to rewild) and more importantly the Minster Marshes. A sanctuary for birds and wildlife forever.

I'm [REDACTED] and probably never see the damage you will leave after years of your distruction - I have seen the damage left to Pegwell Bay after Nemo Link - which was never put right!! So why would I trust NG now?

I'm not a letter writer so all I want to say is leave Minster Marshes to the wildlife - they deserve it and please find somewhere else to build your converter even if does cost more money!!

LEAVE MINSTER MARSHES ALONE for future generations and the WILDLIFE.
