

It is hard to keep up with what the hoverport will be used for, as this seems to have changed after the last consultation. I am so sad about this plan to use the hoverport as a construction site. I grew up here, and have always loved walking in one of very few wildlife places in Thanet. I can see that access along the paths at the hoverport will be restricted during construction and I will miss walking and cycling along the peaceful paths enroute to the nature reserve. It is bound to damage wildlife and the saltmarsh. Have you properly assessed for damage? Thanet is a deprived area, and we need more wildlife places, not less. It's so important to mental health.
