

The Hover Port was part of the original proposal which was subsequently rejected by TDC due to the adverse impact the proposal would have on wildlife, migrating birds and the lives of those living on Sandwich Road in Clifftsend. National Grid clearly have no respect for the TDC decision, the SSSI area they are proposing to destroy in addition to the physical/mental integrity of the Clifftsend residents. These residents have the right to private and family life which should be respected and not destroyed by National Grid in the process of making a profit.
