

I object to the use of Pegwell Hoverport as well as the salt marsh by NG on the following grounds.

They haven't done the correct surveys that will show how their proposals will cause long term if not permanent damage to the saltmarsh, which is also a natural habitat for plants, animals and birds providing a safe haven also to migrating birds. It is also an area of local importance providing an ever diminishing area of open space which is good for people's health and wellbeing. There has been a lack of honesty and transparency from NG and they haven't considered further damage to the local environment with the obvious use of heavy traffic to service the area. This will cause pollution in the form of dirt, noise as well as fumes. Our roads which are already struggling to cope with the volume of local traffic, will suffer more damage and congestion. I know no local people who support this quest by NG which appears to be more about increasing their profits than benefitting the environment. It is not going to be a "green" project when they are prepared to cause so much environmental damage in doing it, especially as technology moves forward at such a pace that it will no doubt be obsolete within a very short space of time, compared to how long the damage they will cause will take to repair and rejuvenate.
