

I strongly objected to the use of the old Hoverport site at Pegwell bay .

This is the most important wilderness and home to so many plants , mammals & insects.

It would be destroyed forever by what NG plan to use it for . I am a local who has lived here all my life , the whole of the SE Kent is being covered in housing and this is one of the very few truely natural environments please leave it alone .

The whole convert station is truely horrific and not being built in the right place. The marshes as well as being home to wildlife, flood every winter just go and look !!

Just stop destroying our beautiful nature reserve.
