I do not want to see the hoverport site at Pegwell Bay used as a construction site by National Grid. It is a place of peace where people can walk and picnic while looking out over a the beautiful bay, so populated by migratory birds due to that peace. I use this place to paint the stunning tranquil scenery and I do not want that to be destroyed.

If any use is made for a construction site, everybody knows it will never be restored as it is. I appeal that nothing is allowed to happen to change this place of rare beauty.
