

Dear Planning Inspectorate,

It has come to my attention that the local wildlife sanctuary at Pegwell Bay, Ramsgate is under significant threat due to the proposal of Sea Link. The impact to the local environment and wildlife will be severely impacted, this will result in complete biomes being erased from the community.

The work will also be undertaken on a disused hover port which was built upon an old wasteland. The toxins that will be released into the air after the concrete collapses due to the weight of the vehicles will have a significant impact on the local residents and wildlife in Clifftsend.

As a professional and passionate resident of Ramsgate, I believe this to be a [potential] catastrophic end to one of the rare inclusive environments South East Kent has to offer.

Do take the people's comments seriously.

Best regards,

Matthew
