

We use the hoverport site as a plquiet place to walk, think, unwind and distress. We observe the wonderful balance of nature there and have seen many species being reintroduced since the abolition of the hovercraft. For fourty years that important habit lat has been re-wilding, nature has claimed it back. Please do not deprive local people of the valuable natural areas that are becoming fewer and fewer. We need to protect our environment not break it up and damage it which I believe the use of the site with heavy vehicles would do. Please leave the hover port as a wild space for nature including us people who live here and use it.
