

Please do not build on the SSI Pegwell Bay and Minster Marshes. It is full of wildlife that will suffer and will affect the wellbeing of anyone in the surrounding area, due to noise/light pollution and damage to the water and eco systems. The use of the hoverport is particularly unsuitable, as it is made of broken concrete ontop of chalk. To transport 10 ton trucks ontop, it will crush the surface and pollute the surrounding wildlife area. Please use a brownfield site instead.
