

Dee Wild

This combined with other developments being planned for this historic, highly Scenic and area of special scientific interest will turn this beautiful part of the country into an industrial wasteland with no regard for the ecological damage and decimation of the species therein.

Whilst the govt is making all the relevant noises in regards of protection of areas such as this, the hypocrisy is astounding.

The damage will be irreversible. The area destroyed and the beauty that attracts visitors to the small businesses along this stretch of coastline decimated. I strongly condemn and oppose this blight of blinkered capitalism that pays no regard to our children's future and the future of the earth.
