

## **The Sea Link Project**

### **Planning Act 2008**

#### **The Infrastructure Planning (Compulsory Acquisition) Regulations 2010**

##### **Notice under regulation 9(a)**

The names, addresses for service and contact details of the additional affected persons are-

##### **EITHER**

- (a) as described in the supplement to Part I of the book of reference (persons within Category 1 set out in section 57(1) of the Planning Act 2008 and persons within Category 2 set out in section 57(2) of that Act): **YES**

##### **OR**

- (b) as described in the supplement to Part I of the book of reference (persons within Category 1 set out in section 57(1) of the Planning Act 2008 and persons within Category 2 set out in section 57(2) of that Act). subject to the changes described in documentation attached to this notice: **NO**

##### **OR**

- (c) as described in the documentation attached to this Notice: **NO**

in relation to the proposed provision to authorise the compulsory acquisition of additional land for the Sea Link Project which would comprise:

- a connection from the existing transmission network via Friston (Kiln Lane) Substation, including the substation itself, a high voltage alternating current (HVAC) underground cable of approximately 1.9 km in length between the proposed Friston (Kiln Lane) Substation and a proposed 2 GW high voltage direct current (HVDC) converter station (including permanent access from the B1121 and a new bridge over the River Fromus) up to 26 m high plus external equipment (such as lightning protection, safety rails for maintenance works, ventilation equipment, aerials, similar small scale operational plant, or other roof treatment) near Saxmundham
- a HVDC underground cable connection of approximately 10 km in length between the proposed converter station near Saxmundham, and a transition joint bay (TJB) approximately 900 m inshore from a landfall point (below) where the cable transitions from onshore to offshore technology
- a landfall on the Suffolk coast (between Aldeburgh and Thorpeness
- approximately 122 km of subsea HVDC cable, running between the Suffolk landfall location (between Aldeburgh and Thorpeness), and the Kent landfall location at Pegwell Bay
- a landfall point on the Kent coast at Pegwell Bay
- a TJB approximately 800 m inshore to transition from offshore HVDC cable to onshore HVDC cable, before continuing underground for approximately 1.7 km to a new 2 GW HVDC converter station (including a new permanent access off the A256), up to 28 m high plus external equipment such as lightning protection, safety rails for

maintenance works, ventilation equipment, aerials, and similar small scale operational plant near Minster and a new substation which would be located immediately adjacent

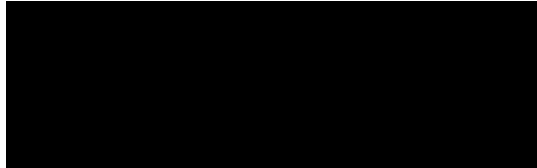

- removal of approximately 2.2 km of existing HVAC overhead line, and installation of two sections of new HVAC overhead line, together totalling approximately 3.5 km, each connecting from the substation near Minster and the existing Richborough to Canterbury overhead line.

(Completed certificate to be received by the Planning Inspectorate no later than 10 working days after the deadline date stating the applicant has fulfilled requirement at either (a), (b) and (c) above)
