

I would like to make a comment at the Open floor hearing. If I am unable to make it as I cannot yet find out where and when this will be! I would like to say that I am objecting to National Grid proposing to use the old rewilded Hoverport site. This area is such a valuable local resource that people from all around like to go to and can access for leisurely walks and to enjoy the quietness and the wildlife there. If National Grid get their way it will be destroyed and repeatedly used for their own gains. There is also the very serious risk of the site being damaged and pollutants being released into the Bay causing an environmental catastrophe!
