

I appeal to the board not to go ahead with this project on the grounds that it is detrimental to our area, the country side, villages wild life and especially the people. The area in question is mit suitable by far to house such roads or structures, the bridges aren't strong enough nor is the ground. We are living in an ancient area of outstanding peace, tranquility and harmony with nature. We nor the country can waste so much time effort and money on such projects that are of no use to us or our future generations. This area is just being used as a stop gap to allow the power to be transferred to the south or back out to where it will make the most profit. Neither will it be of any use to us if our kin ever .
Please please please we are begging you to stop squandering our hard earned money to make more for yourselves.
