

I am strongly opposed to National Grid's Change of Request to commandeer a larger part of the hoverport to access Pegwell Bay. This move very unpopular and devestation. It is SSI land which I have been using as a botanical teaching site since 2012 with rare flora and fauna. I have documentation of hundreds of pupils of all ages attending these outdoor classes.

This hoverport is a fantastic bio reserve which much be preserved for the people of Thanet and beyond.
