

Benhall and Sternfield Parish Council would like to speak at the OFH about the fact that since problems with transporting AILs over Benhall Railway Bridge were not disclosed until after the Sea Link DCO application had been submitted, difficulties associated with using the B 1121 through Benhall to access the Saxmundham converter stations site were misrepresented and local residents were not able to reach an informed decision when access routes were being considered during the statutory consultation. The Parish Council would also like to address SCC's longstanding significant concerns regarding Benhall Railway Bridge which have led to an alternative access route being proposed and would urge that, even though it is being considered at such a late stage in proceedings, this new route is properly evaluated.
