

Would request that the ExA make an accompanied (ideally) or unaccompanied visit to see the current works being undertaken by SZC and SPR EA1N and EA2 to understand how diversions to the road network due to the matters contained in Change Request 1 (CR1) would operate and the impact of these, and to gather first-hand evidence from the construction of bell mouths on B1069, and construction of roundabouts at A12/A1094 and A12/B1122. Also to visit site/length of the SZC Sizewell Link Road (SLR) as this has been announced by the Applicant as a possible co-location matter or alternative route for proposed SeaLink infrastructure. Thank you.
