

My name is Marion Walker

I am a resident of [REDACTED] and live [REDACTED] to the bridge that is causing a lot of problems.

I believe a new solution has been put forward by Suffolk county Council

to take the traffic away from Benhall bridge and involves a northern route via Leiston which involves using the new roadways being built for Sizewell C. I think if the project is approved this should be one of the conditions to use this new route!

Our local road systems around Benhall & Saxmundham are not built to withstand the volumes of traffic which are already increasing because of Sizewell C/Scottish Power/2 Solar Farms & Suffolk Water Recycling!

At 8am the A12 near our home has tailbacks of over a mile which if the junction by us got blocked it could result in gridlock which would then hinder all traffic including emergency vehicles. This is happening all over this region and if the traffic continues to increase exponentially I dread to think what the outcome will be.
