

Dear Examiners, I do not feel that National Grid has adequately addressed my concerns that I have raised.

Flood risks

Property devaluation and difficulties in selling properties near to the proposed Sealink project.

Detrimental effects on nearby businesses

Bad effects on Tourism to Thanet

Extremely harmful effects on our wildlife and natural environments, with totally inadequate mitigation attempts!

Road traffic congestion and chaos!

Air pollution and noise pollution!

Damage to our roads and extra delays for people trying to get to and from their places of work!

Effects of loss of recreational areas on people's mental health!

And I do not believe that the Need for this proposed Sealink project is vital! and cannot be overcome by a much less damaging alternative!

Please reject this proposal!
