Subject: Objection to continuing planning
Date: 30 April 2026 08:03:11

I am writing as I have been following these outrageous procedures that are ongoing with regards to Sealink project and Minster Marshes.

The Area you are planning to use is directly in the paths of not 1 but 2, SSSI sites!

These sites are strictly regulated under the Wildlife & Countryside Act 1981.

They are there due to their inhabitants of endangered wildlife, many of who are 'Red Listed!'

Your project will not only damage the integrity of these sites, which are of National, interest, but will have negative impact on the lively hood and prosperity of all surrounding villages.

Already your footprint is and has destroyed many areas with its traffic and human prescence in breeding season.

I do not see any proof of EIA's having been completed.

In my opinion, there can be no compromise, in this situation as any form of human activity here must be a pollutant.

I therefore feel that my objection should be amassed with what I'm sure are many others, and sent to the relevant governing body of this unethical development.

Thank you

Yours sincerely

Miss T. Vincent.
