> You don't often get email from [redacted]@icloud.com. Learn why this is important

Good morning,
My name is Natalia , my family and I are residents of Walberswick and have been to several meetings regarding ill thought and not well researched and justified plans to run the cables damaging the countryside and wildfire , impacting the tourism along the way of Walberwick and coast .
Initially Lionlink/sealink were claiming the project would be 1.1 billion but in fact Ofgem now assessed sea link At approximately 3.2 billion pounds of taxpayers money - three times the cost claimed initially would need to be spent .
It is a profit organisation in fact as well , not benefiting the people but giving eye watering bonuses to their top staff
There are other available alternatives which are brushed off (it's easier to dig up and put cables everywhere rather than work at brownfield sites available).

Yes, transition to net zero is important but it needs to be not rushed as it seems in this case.

I therefore urge tha lt alternative is independently and transparently assesssd against sea link on cost, delivery time , network capacity and environmental impact .
Sincerely yours,
Regards
Natalia
