Dear South East Anglia Planning Inspectorate
Please please please reconsider the impact on Minster Marshes and Pegwell Bay.
There are so many reasons that this proposal is not a viable option and should be turned down.
I list them as follows:
1. The loss of an irreplaceable habitat for red-listed and endangered species of birds and wildlife
2. Internationally significant bird populations that CANNOT be relocated or recreated
3. Environmentally this is a catastrophic proposal which has been under-costed
4. This proposal will affect productive farmland undermining food security
5. As a generation we are the custodians of this land and we MUST preserve it for future generations
6. Sea Link is the wrong project. The damage it will do to the geographical area will leave a terrible legacy for future generations to come....
Regards
Rosemary Ellison
