Please do not destroy our beautiful Heritage Coast with this mindless development. It will threaten the status of Heritage Coast, making a mockery of the designation, damage the critical tourist industry and only shareholders will benefit. This project should be for brown site land only, and be sited nearer to the area that requires the power. Some things such as this must be judged for long term impact, not just short term profits.
The coastline and immediate hinterland is already impacyed enough by Sizewell development (which I fully support). Please don't let it be damaged beyond repair by this mindless plan.
Jackie & John Sibley
