Sir, I write with regards to the proposal to develop the Sealink converter station at Saxmundham. I believe that there exists better value for money by building in a different manner to that which is proposed. I believe there is the option to build offshore and remove the need to build onshore.
I am also very concerned by the the onshore project as it is proposed to build in the field next to my property. The construction of a converter station would bring noise , dust and light pollution into my property with the resulting impact to my health and wellbeing.
I have challenged on the proposal to build so close to residential properties here in Saxmundham with no real honest response from the Sealink development people.
Further to all of this worry about Sealink is a proposal to develop a Lionlink converter station which would be even closer to my property.
Given that there is an alternative to building close to my property I genuinely request that you do not allow the development to take place.
I appreciate being given the opportunity to contact you on this matter.
Yours sincerely,
Stephen Willmore
