Subject: Sea Link National Grid on site and digging up Minster Marshes

Dear [redacted]

What is the point of having a planning process if big business can just go ahead regardless? I know that you are going to say yes to National Grid because Ed Miliband has already received the brown envelope but surely the process should look meaningful.
The good people of Thanet have been taken for fools by not just National Grid but also by politicians like yourself who are supposed to represent us.
This matter was raised in Parliament by the MP for Sandwich and your boss has said he will investigate which means he will speak to you and no doubt that will be a waste of time.
Unfortunately, the people of Thanet have no representation in Parliament on this matter because she has recused herself.
I know you won't reply to me because you have already been bought by National Grid otherwise work would not have started and we would have a representative in Parliament.
We pay taxes and we should be represented on this important matter. That's how democracy works which I know goes against this Government's modus operandi.
Closing down Pegwell Bay for 4 years and destroying a wetland is an unacceptable price to pay for green energy when there are alternative routes.

Yours sadly

Paul Whiteman
