Subject: Sea Link Project Minster Marshes and Pegwell Bay

Dear Prime Minister, I am writing to you, [redacted], [redacted], [redacted], [redacted], [redacted] & [redacted] about the OFGEM ASTI consultation on funding for National Grid's Sea Link project. This is estimated by OFGEM to cost nearly £3.2bn, raising concerns about whether it represents appropriate use of public funds at a time of significant pressure on government budgets. Should public funding be used for a project delivered by a privatised company that reported £3.241bn in statutory earnings, with approximately £2.4bn distributed to private investors, highlighting concerns over the balance between public risk & private reward. SaveMinsterMarshes (SMM) and SuffolkEnergyActionSolutions (SEAS) have spent 4 years

examining the project’s need case & believe there are significant flaws in its justification. We were prevented from presenting this evidence to the ExA & although a decision has not been made it appears work has already started.
Please review & stop this.
