Subject: Please help

Dear Rt Hon Miatta Fahnbulleh MP

Please,
Please would you take 4 hours to
Come and see what is going on on the Suffolk coast? I have spent the last 21 years building a thriving local gastro pub only to find that a combination of hungry international businesses and politicians with a lack of attention to detail are making it nearly impossible to work financially. Last week the fire in the next door village also dented our business though fearful customers- imagine if the fire had been 4 miles down the coast?
Our life is being attacked on all sides and whilst I know you are unbelievably busy it would need you to see how the different energy projects have an impossible accumulated effect.
If you are too busy then could you a least send someone to see and listen to the well thought out and intelligent reasons we have for strongly disagreeing with the current plans.
I am not sending you the generic letter because I wanted it to be a bit more heart felt and hopefully get a thoughtful reply.
The loss of business is catastrophic as is the wildlife issue- it's particularly bad because other better value plans are available.
Please listen and try to help in your new capacity. Our role is particularly important as we are one of the few employers locally - currently employing 60 staff- 80 %?would be otherwise unemployed .
Best wishes
Sophie dorber ([redacted])
