Dear Sir / Madam

Targeted landowner consultation on proposed changes to the project called Norwich to Tilbury concluding 11.59 pm on 18 July 2025

Consultation notice under Sections 42 and 44 of the Planning Act 2008 (as amended)

The Infrastructure Planning (Applications and Prescribed Forms and Procedure) Regulations 2009 (as amended) (the "APFP Regulations")

Notification under the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 (as amended) (the "EIA Regulations")

TO BOOK A MEETING TO DISCUSS HOW THIS PROPOSAL AFFECTS YOUR LAND INTEREST(S) PLEASE CONTACT:

FISHER GERMAN LLP Norwich to Tilbury Lands Team The Atrium Risby Business Park Risby Bury St Edmunds Suffolk IP28 6RD

Telephone: 0808 1753 314

Email: Norwich-Tilbury@fishergerman.co.uk

If you require a meeting please contact the team as soon as possible using the details set out above. You do not need to have your meeting before submitting your feedback by 11:59 pm 18 July 2025.

Targeted Landowner Consultation

We are writing to you in relation to National Grid Electricity Transmission plc ("National Grid") proposed application for an order granting development consent to construct and operate the project called Norwich to Tilbury ("the Project").

From April to July 2024, we held a statutory public consultation, inviting landowners and local communities to share their views on our proposals. Furthermore, between 30 January and 17 April 2025 we undertook both statutory and non-statutory targeted consultations with landowners and local communities in certain locations along the route. We have carefully reviewed all the feedback and have identified some locations where we are minded to make changes to the proposals published to date.

Most of these latest proposed changes have been identified from the feedback we received at our statutory consultation in summer 2024 and our targeted consultations this year, alongside considerations given to information gathered via environmental and engineering surveys.

Based on our understanding of landownership, we believe you may have an interest in land and/or property impacted by these proposed changes and as such our consultation with you here is statutory under Section 42 and 44 of the Planning Act 2008 ("the Act").

The proposed changes that may impact your land holdings are shown on the enclosed plan. No final decisions have been made on the proposed changes.

This landowner consultation runs until 11:59 pm 18 July 2025.

The Project

The Project is a proposal by National Grid to upgrade the electricity transmission system in East Anglia between Norwich and Tilbury, comprising:

- a new 400 kilovolt ("kV") electricity transmission connection of approximately 180 kilometres ("km") in overall length from Norwich Main Substation via Bramford Substation and a new Tilbury North Substation, into Tilbury Substation comprising:
 - approximately 159 km of new overhead line supported on approximately 510 steel lattice pylons (approximately 50 metres ("m") in height) some of which are gantries (typically up to 15 m in height) within proposed Cable Sealing End ("CSE") compounds, or existing or proposed substations; and
 - approximately 22 km of 400 kV underground cabling some of which is located through the Dedham Vale National Landscape (formerly known as Dedham Vale AONB);
- seven new CSE compounds, each with a permanent access, to connect the overhead lines to the underground cables;
- a new 400 kV East Anglia Connection Node ("EACN") substation, with a new permanent access, on the Tendring Peninsula. This is proposed to be an Air Insulated Switchgear ("AIS") substation;
- a new 400 kV Tilbury North Substation to the south of Orsett Golf Course in Thurrock with access options. This is proposed to be a Gas Insulated Switchgear (GIS) substation;
- modifications to the existing National Grid Electricity Transmission overhead lines, including into and out of the new 400 kV Tilbury North and access options.
- substation extension works at the existing Norwich Main and Bramford substations to connect and support operation of the new transmission connection; and
- temporary works associated with the construction of the Project

Third party utilities diversions and/or modifications would also be required to facilitate the construction of the Project. There would also be land required for mitigation, compensation and enhancement of the environment including Biodiversity Net Gain.

As well as the permanent infrastructure, land would also be required temporarily for construction activities including, for example, working areas for construction equipment and machinery, site offices, welfare, storage and temporary construction access.

The Project would be designed, constructed and operated in accordance with applicable health and safety legislation. The Project would also need to comply with design safety standards including the National Electricity Transmission System ("NETS") Security and Quality of Supply Standard, which sets out the criteria and methodology for planning and operating the NETS. This informs a suite of National Grid policies and processes, which contain details on design standards required to be met when designing, constructing and operating assets such as proposed for the Project.

Norwich to Tilbury will play a vital role in delivering electricity efficiently, reliably, and safely and will support the UK's move to reduce carbon emissions. We are committed to working with local communities as we develop our plans.

National Grid expects the Project to be classified as a Nationally Significant Infrastructure Project ("NSIP"), as defined under Part 3 of the Act, and to require consent from the Secretary of State via a development consent order ("DCO"). The development consent being sought would include a number of other provisions, including those for the compulsory acquisition of land and interests in and rights over land, overriding easements and other rights, the temporary use of land, and other ancillary powers, if necessary, to construct and maintain the Project.

The Project is an Environmental Impact Assessment ("EIA") development, as defined by the EIA Regulations and is currently in the pre-application stage of the DCO application process.

Enclosed with this letter

Enclosed with this letter is a plan(s) of our latest proposals as they relate to your land holding, a guide to reading plans, information regarding data protection, a landowner feedback questionnaire and a freepost envelope. Digital plans showing your land interests are available on request from Fisher German using the contact details at the start of this letter.

Further information on the Project

Further general information on the Project and copies of our previous consultation materials can be found on our website at: nationalgrid.com/norwich-to-tilbury

The 'Document Library' tab on the Project website includes all information related to the Project that has previously been consulted on and which remains relevant. This includes

Material published as part of the summer 2024 statutory consultation:

- Project Background Document
- Copy of the notice published as part of the summer 2024 statutory consultation under Section 48
 of the Act (as the Project is 'EIA Development' for the purposes of the EIA Regulations and as
 required by Regulation 4 of the APFP Regulations)
- 2024 PEIR and non-technical summary of the 2024 PEIR
- Project maps/Project area maps showing the extent of the Project
- Statement of Community Consultation

Material published during targeted consultations in 2025:

- Targeted Statutory Consultation Strategy
- Targeted Consultation Strategy
- Targeted consultation feedback questionnaire
- Targeted consultation overview map
- Consultation leaflet for each of the targeted consultation locations
- Environmental Impacts of Change document for each of the targeted consultation locations

Please note that the consultation documents on our website refer to deadlines for responding. These deadlines do not apply to any responses you wish to send to us in respect of this letter. Details of how you can respond to this letter are outlined below.

Responding to the consultation

As a person with an interest in land, we would welcome any feedback you might have on how the proposed changes may impact your land interest as well as any comments on the proposed Project.

The deadline for submitting feedback is 11:59 pm 18 July 2025.

Meeting

We encourage recipients of this letter to arrange a meeting with Fisher German (as cited at the start of this letter) via Microsoft Teams (or equivalent), telephone, or face-to-face.

Email

Responses to this consultation via the feedback questionnaire or free text response, can be submitted via email to Norwich-Tilbury @fishergerman.co.uk.

Post

Alternatively, you can return a printed copy of the landowner feedback questionnaire using the prepaid envelope or via **FREEPOST N TO T** (please write this in capitals, you do not need a stamp).

Technical Documents

Requests for paper copies of the technical documents published on the Project website will be reviewed on a case by-case basis. To cover printing costs a reasonable copying charge may apply, to be paid for by the recipient and up-to a maximum value of £500 for the whole suite of consultation documents.

Please get in touch with us using the details below if you would like a printed or alternative format copy of materials.

Telephone: 0808 1753 314

Email: Norwich-Tilbury@fishergerman.co.uk

Next Steps

We will consider all comments received relating to our proposals. Furthermore, there will also be an opportunity for you to give your views on our proposals, once our application has been submitted. You would make these comments directly to the Planning Inspectorate whilst our application is being examined.

We may be required to make copies of representations available to the Secretary of State. However, we will request that personal details are not placed on the public record. Personal details will be held securely in accordance with the relevant data protection legislation and will be used solely in connection with the consultation process and the development of this Project and, except as noted above, will not be disclosed to any third parties.

National Grid's privacy policy can be found on its website: https://www.nationalgrid.com/privacy-policy.

If you have any questions about the Project, please do not hesitate to contact us at the above postal or email address.

We look forward to hearing from you.

Reference: **Date**

Dear [Name]

Landowner notification and targeted landowner consultation on changes to our proposals for **Norwich to Tilbury June 2025**

Norwich to Tilbury is a proposal for a new electricity transmission connection. It will play an important part in connecting new sources of more affordable, low carbon electricity from where it is generated to where it

From April to July 2024, we held a statutory public consultation, inviting local communities to share their views on our proposals. Furthermore, between 30 January and 17 April 2025 we undertook both statutory and non-statutory targeted consultations with landowners and local communities in certain locations along the route. We have carefully reviewed all the feedback and have identified some locations where we are minded to make changes to the proposals published to date.

As a result, we believe our project order limits will extend into a section of your land. This is shown on the enclosed plan, and we would like to meet with you to discuss this in more detail. Please contact our land agents Fisher German, at your earliest convenience, to set up a meeting. They can be contacted on:

FISHER GERMAN LLP Norwich to Tilbury Lands Team The Atrium, Risby Business Park Bury St Edmunds Suffolk IP28 6RD Telephone: 0808 1753 314

Email: Norwich-Tilbury@fishergerman.co.uk

With this letter, we have enclosed some important information about the Project and how it may affect you as a landowner:

- 1. Land plan to show your land interest and the proposed project draft order limits, as published at statutory consultation, and updated in May 2025; the order limits refer to land that may be temporarily or permanently required for the construction and/or operation of the project
- 2. Guide to reading the plans
- 3. Formal notice to you, as required by Section 42 of the Planning Act 2008
- 4. Letter inviting you to enter into early voluntary negotiations with us regarding the Land Rights required over your land and property, to facilitate the project
- 5. National Grid's Land Rights Strategy which sets out our commitment to you as a landowner affected by our proposals
- 6. Feedback questionnaire to provide comments on the updated plans along with a reply-paid envelope

We recognise that land discussions for projects like this can be complex and we recommend that you appoint a suitably qualified representative to act on your behalf where we are seeking rights to carry out FREEPOST N TO T

T: 0800 915 2497 email: contact@n-t.nationalgrid.com www.nationalgrid.com/n-t

works on your property. An agent/surveyor will advise you on the process and your rights, and can handle any compensation claims on your behalf. We will reimburse you for professional fees reasonably incurred in respect of all claims and advice on legal agreements in connection with associated land rights.

Providing feedback

We have a duty to develop the most appropriate proposal, taking account of feedback from landowners, as well as local communities, alongside all the environmental and technical assessments.

In addition to any feedback you may have provided as a member of the local community to our statutory consultation last year, we would like to hear if you have any comments on how the updated plans may affect your land interest, or any aspect of our proposals. Please complete the enclosed feedback form and return it to us in the reply-paid envelope. Alternatively, you can send us your feedback by post or email using the contact details below.

- Email Norwich-Tilbury@fishergerman.co.uk
- Freepost FREEPOST N TO T

Please provide any feedback by 11.59pm on Friday 18 July 2025.

For more information on how our proposals have been developed and to view information published during previous consultations, please see our project website www.nationalgrid.com/norwich-to-tilbury

Next steps

It is very important that we meet with you to discuss how our proposals may affect your land interest. Please contact our land agents, Fisher German, to arrange a meeting at your earliest convenience.

They can be contacted on:

- Telephone: 0808 1753 314
- Email: Norwich-Tilbury@fishergerman.co.uk

We will consider all comments received relating to our proposals. There will also be a further opportunity for you to give your views on our proposals, once our application has been submitted, directly to the Planning Inspectorate when our application is examined.

With best wishes.

Yours faithfully

Previously consulted Category 1 and Category 2 PILs S42(1)(d) letter

18th June 2025

Dear Sir/Madam

Landowner consultation on proposed changes to the project called Norwich to Tilbury concluding 11.59 pm 18 July 2025

Consultation notice under Sections 42 and 44 of the Planning Act 2008 (as amended)

The Infrastructure Planning (Applications and Prescribed Forms and Procedure) Regulations 2009 (as amended) (the "APFP Regulations")

Notification under the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 (as amended) (the "EIA Regulations")

We are writing to you in relation to National Grid Electricity Transmission plc ("National Grid") proposed application for an order granting development consent to construct and operate the project called Norwich to Tilbury ("the Project").

From April to July 2024, we held a statutory public consultation, inviting landowners and local communities to share their views on our proposals. Furthermore, between 30 January and 17 April 2025 we undertook both statutory and non-statutory targeted consultations with landowners and local communities in certain locations along the route. We have carefully reviewed all the feedback and have identified some locations where we are minded to make changes to the proposals published to date.

Most of these latest proposed changes have been identified from the feedback we received at our statutory consultation in summer 2024 and our targeted consultations this year, alongside considerations given to information gathered via environmental and engineering surveys.

Based on our understanding of landownership, we believe you may have an interest in land and/or property impacted by these proposed changes and as such our consultation with you here is statutory under Section 42 and 44 of the Planning Act 2008 ("the Act").

The proposed changes that may impact your land holdings are shown on the enclosed plan. No final decisions have been made on the proposed changes.

This landowner consultation runs until 11:59 pm 18 July 2025.

The Project

The Project is a proposal by National Grid to upgrade the electricity transmission system in East Anglia between Norwich and Tilbury, comprising:

- a new 400 kilovolt ("kV") electricity transmission connection of approximately 180 kilometres ("km") in overall length from Norwich Main Substation via Bramford Substation and a new Tilbury North Substation, into Tilbury Substation comprising:
 - approximately 159 km of new overhead line supported on approximately 510 steel lattice pylons (approximately 50 metres ("m") in height) some of which are gantries (typically up to 15 m in height) within proposed Cable Sealing End ("CSE") compounds, or existing or proposed substations; and
 - approximately 22 km of 400 kV underground cabling some of which is located through the Dedham Vale National Landscape (formerly known as Dedham Vale AONB);
- seven new CSE compounds, each with a permanent access, to connect the overhead lines to the underground cables;
- a new 400 kV East Anglia Connection Node ("EACN") substation, with a new permanent access, on the Tendring Peninsula. This is proposed to be an Air Insulated Switchgear ("AIS") substation;
- a new 400 kV Tilbury North Substation to the south of Orsett Golf Course in Thurrock with access
 options. This is proposed to be a Gas Insulated Switchgear (GIS) substation;
- modifications to the existing National Grid Electricity Transmission overhead lines, including into and out of the new 400 kV Tilbury North and access options.
- substation extension works at the existing Norwich Main and Bramford substations to connect and support operation of the new transmission connection; and
- temporary works associated with the construction of the Project

Third party utilities diversions and/or modifications would also be required to facilitate the construction of the Project. There would also be land required for mitigation, compensation and enhancement of the environment including Biodiversity Net Gain.

As well as the permanent infrastructure, land would also be required temporarily for construction activities including, for example, working areas for construction equipment and machinery, site offices, welfare, storage and temporary construction access.

The Project would be designed, constructed and operated in accordance with applicable health and safety legislation. The Project would also need to comply with design safety standards including the National Electricity Transmission System ("NETS") Security and Quality of Supply Standard, which sets out the criteria and methodology for planning and operating the NETS. This informs a suite of National Grid policies and processes, which contain details on design standards required to be met when designing, constructing and operating assets such as proposed for the Project.

Norwich to Tilbury will play a vital role in delivering electricity efficiently, reliably, and safely and will support the UK's move to reduce carbon emissions. We are committed to working with local communities as we develop our plans.

National Grid expects the Project to be classified as a Nationally Significant Infrastructure Project ("NSIP"), as defined under Part 3 of the Act, and to require consent from the Secretary of State via a development consent order ("DCO"). The development consent being sought would include a number of other provisions, including those for the compulsory acquisition of land and interests in and rights over land, overriding easements and other rights, the temporary use of land, and other ancillary powers, if necessary, to construct and maintain the Project.

The Project is an Environmental Impact Assessment ("EIA") development, as defined by the EIA Regulations and is currently in the pre-application stage of the DCO application process.

Enclosed with this letter

Enclosed with this letter is a plan(s) of our latest proposals as they relate to your land holding, a guide to reading plans, information regarding data protection, a landowner feedback questionnaire and a freepost envelope. Digital plans showing your land interests are available on request from Fisher German using the contact details at the end of this letter.

Further information on the Project

Further general information on the Project and copies of our previous consultation materials can be found on our website at: nationalgrid.com/norwich-to-tilbury

The 'Document Library' tab on the Project website includes all information related to the Project that has previously been consulted on and which remains relevant. This includes:

Material published as part of the summer 2024 statutory consultation:

- Project Background Document
- Copy of the notice published as part of the summer 2024 statutory consultation under Section 48
 of the Act (as the Project is 'EIA Development' for the purposes of the EIA Regulations and as
 required by Regulation 4 of the APFP Regulations)
- 2024 PEIR and non-technical summary of the 2024 PEIR
- Project maps/Project area maps showing the extent of the Project
- Statement of Community Consultation

Material published during targeted consultations in 2025:

- Targeted Statutory Consultation Strategy
- Targeted Consultation Strategy
- Targeted consultation feedback questionnaire
- Targeted consultation overview map
- Consultation leaflet for each of the targeted consultation locations
- Environmental Impacts of Change document for each of the targeted consultation locations

Please note that the consultation documents on our website refer to deadlines for responding. These deadlines do not apply to any responses you wish to send to us in respect of this letter. Details of how you can respond to this letter are outlined below.

Responding to the consultation

As a person with an interest in land, we would welcome any feedback you might have on how the proposed changes may impact your land interest as well as any comments on the proposed Project.

The deadline for submitting feedback is 11:59pm 18 July 2025.

Email

Responses to this consultation via the feedback questionnaire or free text response, can be submitted via email to Norwich-Tilbury@fishergerman.co.uk.

<u>Post</u>

Alternatively, you can return a printed copy of the landowner feedback questionnaire via **FREEPOST N TO T** (please write this in capitals, you do not need a stamp).

Meeting

We understand you (and/or your professional representative) may have met with Fisher German before, or attended one of the consultation events we have held, to discuss the Project.

However, if you would like to arrange a further meeting to discuss the contents of this letter, its enclosures, and/or the wider Project, please get in touch with using the details below.

Telephone: 0808 1753 314

Email: Norwich-Tilbury@fishergerman.co.uk

Technical Documents

Requests for paper copies of the technical documents published on the Project website will be reviewed on a case by-case basis. To cover printing costs a reasonable copying charge may apply, to be paid for by the recipient and up-to a maximum value of £500 for the whole suite of consultation documents.

Please get in touch with us using the details below if you would like a printed or alternative format copy of materials.

Telephone: 0808 1753 314

Email: Norwich-Tilbury@fishergerman.co.uk

Next Steps

We will consider all comments received relating to our proposals. Furthermore, there will also be an opportunity for you to give your views on our proposals, once our application has been submitted. You would make these comments directly to the Planning Inspectorate whilst our application is being examined.

We may be required to make copies of representations available to the Secretary of State. However, we will request that personal details are not placed on the public record. Personal details will be held securely in accordance with the relevant data protection legislation and will be used solely in connection with the consultation process and the development of this Project and, except as noted above, will not be disclosed to any third parties.

National Grid's privacy policy can be found on its website: https://www.nationalgrid.com/privacy-policy.

If you have any questions about the Project, please do not hesitate to contact us at the above postal or email address.

We look forward to hearing from you.

Yours faithfully

10 July 2025

Dear Sir/Madam

Land Registry Title: Title Number

Description of land holding: Land Description

Landowner notification and targeted landowner consultation for Norwich to Tilbury (Category 3 Interests) concluding 11:59pm 22 August 2025

Consultation notice under Sections 42 and 44 of the Planning Act 2008 (as amended)
The Infrastructure Planning (Applications and Prescribed Forms and Procedure) Regulations 2009
(as amended) (the "APFP Regulations")

Notification under the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 (as amended) (the "EIA Regulations")

We are writing to you in relation to National Grid Electricity Transmission plc ("National Grid") proposed application for an order granting development consent to construct and operate the project called Norwich to Tilbury ("the Project").

From April to July 2024, we held a statutory public consultation, inviting landowners and local communities to share their views on our proposals. Furthermore, between 30 January and 17 April 2025 we undertook both statutory and non-statutory targeted consultations with landowners and local communities in certain locations along the route. We have carefully reviewed all the feedback and have identified some locations where we are minded to make changes to the proposals published to date.

Most of these latest proposed changes have been identified from the feedback we received at our statutory consultation in summer 2024 and our targeted consultations this year, alongside considerations given to information gathered via environmental and engineering surveys. Please note that no final decisions have been made on the proposed changes.

It has become apparent from our searches of the Land Registry, that you are in possession of a land interest which may be indirectly affected by part of the **authorised development ("the project")** at this stage. We do not anticipate at this stage that this land will be required for the project; but the future construction or operation of the proposed development may otherwise affect your land and property interests due to your proximity to the proposed development, and as such our consultation with you here is statutory under Section 42 and 44 of the Planning Act 2008 ("the Act").

This landowner consultation concludes **11:59 pm 22 August 2025.** There will also be an opportunity for you to give your views on our proposals once our application has been submitted. You would make these comments directly to the Planning Inspectorate whilst our application is being examined.

The Project

The Project is a proposal by National Grid to upgrade the electricity transmission system in East Anglia between Norwich and Tilbury, comprising:

- a new 400 kilovolt ("kV") electricity transmission connection of approximately 180 kilometres ("km") in overall length from Norwich Main Substation via Bramford Substation and a new Tilbury North Substation, into Tilbury Substation comprising:
 - approximately 159 km of new overhead line supported on approximately 510 steel lattice pylons (approximately 50 metres ("m") in height) some of which are gantries (typically up to 15 m in height) within proposed Cable Sealing End ("CSE") compounds, or existing or proposed substations; and
 - approximately 22 km of 400 kV underground cabling some of which is located through the Dedham Vale National Landscape (formerly known as Dedham Vale AONB);
- seven new CSE compounds, each with a permanent access, to connect the overhead lines to the underground cables;
- a new 400 kV East Anglia Connection Node ("EACN") substation, with a new permanent access, on the Tendring Peninsula. This is proposed to be an Air Insulated Switchgear ("AIS") substation;
- a new 400 kV Tilbury North Substation to the south of Orsett Golf Course in Thurrock with access
 options. This is proposed to be a Gas Insulated Switchgear (GIS) substation;
- modifications to the existing National Grid Electricity Transmission overhead lines, including into and out of the new 400 kV Tilbury North and access options.
- substation extension works at the existing Norwich Main and Bramford substations to connect and support operation of the new transmission connection; and
- temporary works associated with the construction of the Project

Third party utilities diversions and/or modifications would also be required to facilitate the construction of the Project. There would also be land required for mitigation, compensation and enhancement of the environment including Biodiversity Net Gain.

As well as the permanent infrastructure, land would also be required temporarily for construction activities including, for example, working areas for construction equipment and machinery, site offices, welfare, storage and temporary construction access.

The Project would be designed, constructed and operated in accordance with applicable health and safety legislation. The Project would also need to comply with design safety standards including the National Electricity Transmission System ("NETS") Security and Quality of Supply Standard, which sets out the criteria and methodology for planning and operating the NETS. This informs a suite of National Grid policies and processes, which contain details on design standards required to be met when designing, constructing and operating assets such as proposed for the Project.

Norwich to Tilbury will play a vital role in delivering electricity efficiently, reliably, and safely and will support the UK's move to reduce carbon emissions. We are committed to working with local communities as we develop our plans.

National Grid expects the Project to be classified as a Nationally Significant Infrastructure Project ("NSIP"), as defined under Part 3 of the Act, and to require consent from the Secretary of State via a development consent order ("DCO"). The development consent being sought would include a number of other provisions, including those for the compulsory acquisition of land and interests in and rights over land, overriding easements and other rights, the temporary use of land, and other ancillary powers, if necessary, to construct and maintain the Project.

The Project is an Environmental Impact Assessment ("EIA") development, as defined by the EIA Regulations and is currently in the pre-application stage of the DCO application process.

Enclosed with this letter

Enclosed with this letter is an explanatory letter regarding Category 3 interests, a landowner feedback questionnaire and a freepost envelope, together with National Grid's data privacy notice

Further information on the Project

Further general information on the Project and copies of our previous consultation materials can be found on our website at: nationalgrid.com/norwich-to-tilbury

The 'Document Library' tab on the Project website includes all information related to the Project that has previously been consulted on and which remains relevant. This includes:

Material published as part of the summer 2024 statutory consultation:

- Project Background Document
- Copy of the notice published as part of the summer 2024 statutory consultation under Section 48
 of the Act (as the Project is 'EIA Development' for the purposes of the EIA Regulations and as
 required by Regulation 4 of the APFP Regulations)
- 2024 PEIR and non-technical summary of the 2024 PEIR
- Project maps/Project area maps showing the extent of the Project
- Statement of Community Consultation

Material published during targeted consultations in 2025:

- Targeted Statutory Consultation Strategy
- Targeted Consultation Strategy
- Targeted consultation feedback questionnaire
- Targeted consultation overview map
- Consultation leaflet for each of the targeted consultation locations
- Environmental Impacts of Change document for each of the targeted consultation locations

Please note that the consultation documents on our website refer to deadlines for responding. These deadlines do not apply to any responses you wish to send to us in respect of this letter. Details of how you can respond to this letter are outlined below.

Responding to the consultation

As a person with an interest in land, we would welcome any feedback you might have on the proposed project.

The deadline for submitting feedback is 11:59pm 22 August 2025.

Email

Responses to this consultation via the feedback questionnaire or free text response, can be submitted via email to Norwich-Tilbury@fishergerman.co.uk.

Post

Alternatively, you can return a printed copy of the enclosed landowner feedback questionnaire via **FREEPOST N TO T** (please write this in capitals, you do not need a stamp).

Technical Documents

Requests for paper copies of the technical documents published on the Project website will be reviewed on a case by-case basis. To cover printing costs a reasonable copying charge may apply, to be paid for by the recipient and up-to a maximum value of £500 for the whole suite of consultation documents.

Please get in touch with us using the details below if you would like a printed or alternative format copy of materials.

Telephone: 0808 1753 314

Email: Norwich-Tilbury@fishergerman.co.uk

Next Steps

We will consider all comments received relating to our proposals. Furthermore, there will also be an opportunity for you to give your views on our proposals directly to the Planning Inspectorate whilst our application is being examined.

We may be required to make copies of representations available to the Secretary of State. However, we will request that personal details are not placed on the public record. Personal details will be held securely in accordance with the relevant data protection legislation and will be used solely in connection with the consultation process and the development of this Project and, except as noted above, will not be disclosed to any third parties.

National Grid's privacy policy can be found on its website: https://www.nationalgrid.com/privacy-policy.

If you have any questions about the project, please do not hesitate to contact us at the above postal or email address.

We look forward to hearing from you.

Yours faithfully

Dear [Name]

Landowner notification and targeted landowner consultation for Norwich to Tilbury (Category 3 Interests) concluding 11:59pm 22 August 2025

Norwich to Tilbury is a proposal for a new electricity transmission connection. It will play an important part in connecting new sources of more affordable, low carbon electricity from where it is generated to where it is needed. You may have already been written to by our community consultation team, and/or our land agents Fisher German about the project.

From April to July 2024, we held a statutory public consultation, inviting local communities to share their views on our proposals. Furthermore, between 30 January and 17 April 2025 we undertook both statutory and non-statutory targeted consultations with landowners and local communities in certain locations along the route. We have carefully reviewed all the feedback and have identified some locations where we are minded to make changes to the proposals published to date.

It has become apparent from our searches of the Land Registry, that you are in possession of a land interest which may be indirectly affected by part of the authorised development ("the project") at this stage. Specifically, we are now writing to you as a potential Category 3 interest under section 44 of the Planning Act 2008 ("the Act").

A Category 3 interest relates to persons/organisations whose land, whilst not necessarily directly affected by part of the authorised development ("the project"), may be entitled to make a relevant claim for compensation, if development consent for Norwich to Tilbury is granted, and the Development Consent Order is fully implemented.

A relevant claim means a claim under -

- section 10 of the Compulsory Purchase Act 1965
- part 1 of the Land Compensation Act 1973
- section 152(3) of the Planning Act

A land agent/surveyor/legal representative will be able to advise you on your entitlement to make a claim, and your rights as a potential Category 3 interest, in respect of the Planning Act 2008.

FREEPOST N TO T T: 0800 915 2497 email: contact@n-t.nationalgrid.com www.nationalgrid.com/n-t

Enclosures

With this letter, we have enclosed -

- 1. Formal notice to you, as required by Section 42 of the Planning Act 2008
- 2. Landowner consultation feedback questionnaire to provide comments on the project, and a reply-paid envelope
- 3. National Grid's date privacy notice

Providing feedback

We have a duty to develop the most appropriate proposal, taking account of feedback from landowners, as well as local communities, alongside all the environmental and technical assessments.

In addition to any feedback you may have provided as a member of the local community to our statutory consultation last year, we would like to hear if you have any comments on how the updated plans may affect your land interest, or any aspect of our proposals. Please complete the enclosed feedback form and return it to us in the reply-paid envelope. Alternatively, you can send us your feedback by post or email using the contact details below.

- Email Norwich-Tilbury@fishergerman.co.uk
- Freepost FREEPOST N TO T

Please provide any feedback by 11.59pm 22 August 2025.

For more information on how our proposals have been developed and to view information published during previous consultations, please see our project website www.nationalgrid.com/norwich-to-tilbury

We will consider all comments received relating to our proposals. There will also be a further opportunity for you to give your views on our proposals, once our application has been submitted, directly to the Planning Inspectorate when our application is examined.

With best wishes.

Yours faithfully

Norwich to Tilbury

Guide to Our Plans

Summer 2025

Introduction

This document has been produced by National Grid Electricity Transmission plc ('National Grid') to provide guidance on interacting with the draft landowner plans on Norwich to Tilbury (hereafter referred to as the 'Project').

To help explain and visualise the emerging proposals for the Project on your land holdings, we have prepared a series of landowner plans. This guide provides more detail about the plans that are available and what is shown on each plan.

Draft Proposed Project Design Details

New Lattice Pylon

- Structures that support the overhead line (conductors)
- There are two types of lattice pylons; **suspension**: where the conductors are simply suspended from the pylon and **tension (angle)**: where the overhead line changes direction

New Gantry (X

 An overhead bridge-like structure supporting electrical equipment (these are lower height structures typically up to 15 m in height). A transition point from overhead line equipment to equipment in a substation or cable sealing end compound

nationalgrid

New Full Line Tension Gantry

An overhead bridge-like structure supporting electrical equipment (these are lower height structures typically up to 15 m in height). A transition point from overhead line equipment to equipment in a substation or cable sealing end compound

New Overhead Line -

Conductors (wires) carrying electric current, strung from pylon to pylon

New Underground Cable Swathe Centreline -

The indicative centreline for the underground cable construction swathe

New Underground Cable Construction Swathe

Typically, a 120 m wide swathe to allow for installation of the cable, through standard opencut methods. The construction swathe widens where trenchless methods are anticipated

New Underground Cable Trenchless Crossing

Locations where the underground cable installation method is proposed as trenchless (or potentially so) e.g. under main rivers and railways

Existing Substation Boundary

Extent of existing substation

Proposed Substation Boundary

Extent of new substation works

Cable Sealing End Compound (CSEC) Boundary

Extent of proposed CSE compounds. CSE compounds contain equipment needed to transfer transmission circuits between underground cables and overhead lines

Permanent Access Route (incl. Visibility Splays)

Permanent operation and maintenance access

Existing NG/DNO Lattice Pylon and/or Overhead Line (to be dismantled / to be modified X

Shows specific Distribution Network Operator (DNO) lattice pylon alignments and pylon positions to be dismantled/modified

Temporary Works

Temporary NG/DNO lattice pylon and/or overhead line

Shows specific temporary Distribution Network Operator (DNO) lattice pylon alignments and pylon positions

Site Access, Crossover Points and Visibility Splays

- Site Access The location on a Primary Access Route where construction vehicles will transition between the local road network (LRN) and haul roads/working areas
- Crossover Points Locations where haul roads cross the LRN but are not generally proposed for construction HGVs to transition to or from the LRN
- An area proposed to be kept clear of visual obstructions that would impact the ability to see approaching traffic at a junction

nationalgrid

Haul Roads (incl. to the UGC, CSEC, and Substation)

 Temporary roads provided outside of the existing Public Highway. These routes will be managed by National Grid and link the site access points to the working areas. For access to construction works on overhead lines, underground cables, CSE compounds and substations

Crossing Protection Work Area

• Work area required to install scaffolding, required to provide a netted protection of crossings when installing the conductors (e.g. public highways and railways crossings)

Construction Compound K

The type, size and what is included at each compound is subject to the works it is facilitating but may
include: the working yard / storage area, parking, offices, reception, break out areas,
toilets/showers/changing facilities, kitchen/canteen, visitors centre, induction/training room and drying
room

Construction Laydown Area

Areas identified for general construction activities (e.g. for temporary holding of materials)

Reference Only Layers (Historic)

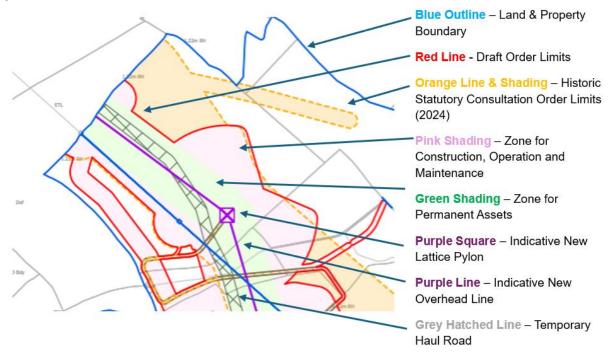

Statutory Consultation Project Order Limits (2024)

- Layer representative of the historic Order Limits published during the Statutory Consultation (2024);
- This layer has been included for <u>reference only</u>, and shows where we have reduced and/or re-aligned the Order Limits;
- Where this layer is included on the plans in isolation from other layers i.e. only the (a) orange dashed outline, (b) orange filled colour, and (c) Land & Property Boundary are present, this land and/or property is **no longer required for the Project.**

Example Plan

The illustration below includes <u>some</u> of the design layers presented in our plans, as described throughout this guide.

Dear Salutation

National Grid – Norwich to Tilbury Landowner Consultation June 2025

We write in relation to the letter and associated documents recently sent to you dated linsert date of letter (NEW PIL 5TH June / existing PILS 18th June) regarding the landowner consultation on potential changes to National Grid's design for the Norwich to Tilbury project.

It has come to our attention that there was a processing issue associated with the legend on the accompanying Guide to Plans where it described the proposed lattice pylon locations (their indicative locations typically shown either with symbols and/or pylon identification numbers). This processing issue may be relevant to you since your plans identified the proposed pylon locations by a pylon identification number. We are writing to provide clarity, and confirm an update to our Guide to Plans, that a pylon is indicated by either a reference number (in this instance 'TB' followed by a number) and/or a pylon icon. (Some plans have a symbol, some have an identification number and some have both) Please see the example below.

New Lattice Pylon X TB101

- Shown as a purple box with a cross and / or a pylon reference (e.g. "TB101")
- Structures that support the overhead line (conductors)
- There are two types of lattice pylons; suspension: where the conductors are simply suspended from the pylon and tension (angle): where the overhead line changes direction

This does not materially affect the information contained within the plans or the project design proposals contained within the documentation available.

If you have any questions and would like to discuss this further please do not hesitate to contact Fisher German on 0808 175 3314 or Norwich-Tilbury@fishergerman.co.uk

Yours faithfully,

Fisher German LLP on behalf of National Grid

Dear Salutation

National Grid – Norwich to Tilbury Landowner Consultation June 2025

We write in relation to the letter and associated documents recently sent to you dated [insert date of letter [NEW PIL 5TH June / existing PILS 18th June)] regarding the landowner consultation on potential changes to National Grid's design for the Norwich to Tilbury project.

It has come to our attention that there was a processing issue associated with the proposed lattice pylon locations (their indicative locations typically shown either with symbols and/or pylon identification numbers) on some of the plans, meaning that in a small number of cases, not all proposed pylon locations were as fully identifiable on the plans as we had intended. The vast majority of the plans issued did not contain this processing issue but we believe the plans issued to you may have.

This does not materially affect the information contained within the plans or the project design proposals contained within the documentation available. We have now revised the relevant plans and enclose them for your records.

We have met with almost half of those affected to date, with no ensuing issues. However, as a result of this update, we have decided to offer an extension to the concluding date of this consultation from 18^{th} July, and now request for your feedback to be received by 11.59 pm on 1^{st} August 2025.

If you would like to discuss any of the proposals shown, please do not hesitate to contact Fisher German on 0808 175 3314 or Norwich-Tilbury@fishergerman.co.uk

Yours faithfully,

Fisher German LLP on behalf of National Grid

Lands Right Strategy

Electricity Transmission

Land Rights Strategy and Payment Schedule for Assets

Version 1

The transmission network is critical national infrastructure and therefore it is crucial that National Grid has the necessary land and land rights to install, operate, access, maintain, repair and protect the transmission network as part of the transition to a cleaner and greener future.

National Grid has an approach called the Land Rights Strategy, which provides a consistent methodology for acquiring land and land rights for their infrastructure projects. This approach is applied across infrastructure projects promoted as Development Consent Order (DCO) and Compulsory Purchase Order (CPO) schemes.

National Grid's preference will always be to secure land rights on a voluntary basis, as this enables the rights being acquired to be tailored to the specific requirements of the project. It is also important in supporting ongoing landowner relations.

The strategy has been implemented on all National Grid Transmission projects since 2010 requiring land and rights acquisition and is under continuous review to ensure that it is still fit for purpose, achieves business requirements, and meets the expectations of third-party landowners and occupiers. National Grid was one of the first utility companies to formally adopt and promote this approach. The Land Rights Strategy has evolved to take into account specific requirements of legislation, evolving industry best practice and also to meet the needs of particular projects.

What is the Land Rights Strategy?

- Provides a consistent methodology for acquiring land and land rights for transmission infrastructure projects;
- Helps to encourage landowners to voluntarily agree to enter into the required agreements, which then helps to preserve long term stakeholder relationships;
- Ensures that there is consistency in the payments made to obtain land rights, and that all landowners are treated fairly and equally and in accordance with the expectations of existing legislation;
- Aligns the approach taken for electricity transmission land rights across the UK National Grid Group Plc companies.

In summary, the overarching strategy is:

All affected landowners are offered Option Agreements to enable National Grid to acquire land, permanent rights over land or to obtain temporary land rights, before the DCO/CPO is granted. National Grid seeks temporary rights for construction activities, and permanent rights (easements) for the "as-built" assets (including all maintenance rights, access, drainage and landscaping/environmental mitigation that may be required for the project).

In parallel with seeking voluntary agreements, through the DCO/CPO process we apply for compulsory acquisition rights as a fall back, should Option Agreements not be secured voluntarily or should there be any issue with implementation of voluntary agreements (e.g. due to events such as insolvency, death/intestacy, loss of capacity etc). National Grid's preference will always be to secure land rights on a voluntary basis.

The payments schedule

1. Payments for surveys and investigation works

Whilst voluntary agreement is always sought, National Grid has statutory rights to gain access to land for surveys and investigation works. As a result, these payments for surveys are not payments for the grant of access rights, but are payments in recognition of damage and disturbance that potentially may be caused by survey and investigation works. National Grid will make the following payments:

Non-intrusive surveys

A payment of £500 advance compensation, per land holding, for a 12 month period.

For night-time visits between 21:00 - 06:00, an advance payment of compensation of £250 will be made for a 12 month period.

Intrusive surveys

Boreholes

A one-off £350 advance payment of compensation for boreholes, per borehole.

Trial pits

A one-off £350 advance payment of compensation for trial pits/holes, per trial pit.

Water monitoring

For water monitoring equipment an advance payment of compensation of £150 per gauge will be made per 12 month period, to cover any site visits.

Survey licence signing fee

In addition, a one-off licence signing fee of £250 will be made if the licence is signed within a two month period.

Notes

Any damage in excess of the above figures would be agreed on an individual basis, on production of evidence and proof of loss.

2. Payments in respect of permanent rights

New overhead lines

A one-off payment in respect of permanent rights per tower and associated oversail, including access rights:

- permanent grass land £6000 (or proportion based on land ownership)
- arable land £8000 (or proportion based on land ownership)

A one-off payment in respect of permanent rights per oversail (where no tower rights are required):

0-49m	50-99m	100m+
£500	£750	£1000

Existing overhead lines

If there is an easement in place but the terms are not fit for purpose, then a one-off payment to vary the agreement will be offered in the sum of £1000.

If there is no easement, or only a wayleave is in place, or if there is no agreement in place at all, then a one-off payment will be made as per the appropriate tower rate for a new easement to be completed.

Underground cables

- agricultural land 80% of land value over the easement width.
- non-agricultural land 50% of land value over the easement width.

These will be subject to a minimum land value £7500/hectare, and a minimum easement payment of £500.

Third party access rights

A one-off payment of £1000 per tower accessed, will be made in return for permanent access rights over third party land for construction and future maintenance activities.

Incentive payments

An incentive payment of **20%** will be applied across any permanent land rights payments (as set out above for new infrastructure), if:

- the Heads of Terms of agreement are returned to National Grid within an 8 week period, and;
- the Option Agreement is legally completed within a further 12 weeks.

Easement payment instalments

Under the terms of the Option Agreement, National Grid will have an option to take entry onto land to construct new electricity transmission assets and following construction to complete the Easement. The payments will be made in instalments:

- 25% of the land rights payment is payable on completion of the Option Agreement
- 50% of the land rights payment is payable on taking entry onto land for construction under the Option Agreement
- 25% of the land rights payment is payable on completion of Easement following construction together with any other payment(s) already agreed.

3. Injurious affection

National Grid acknowledges that any proposed new work may cause concern to landowners. In addition to the other payments outlined, 'injurious affection' and any other appropriate Heads of Claim will be considered on an individual basis in accordance with current legislation.

4. Crop loss, damage and disturbance claims

This will be assessed and paid on a proven loss basis.

5. Land acquisition

Land acquisitions (permanent or temporary) will be agreed on an individual basis.

6. Agents fees

(paid via landowner/occupier)

Fixed fee of £150 for professional land agency services in relation to the return of a completed and signed Land Interest Questionnaire for each landholding declaring all known land interests.

Data privacy notice

National Grid Electricity Transmission plc ('National Grid') is committed to protecting your personal information.

Whenever you provide such information, we are legally obliged to use it in line with all applicable laws concerning the protection of personal data, including the UK General Data Protection Regulation (GDPR).

How will National Grid use the information we collect about you?

We will use your personal data collected via this consultation for a number of purposes, including:

- to analyse your feedback to the consultation
- to produce a Consultation Report, based on our analysis of responses (individuals will not be identified in the report)
- to write to you with updates about the results of the consultation and other developments
- to keep up-to-date records of our communications with individuals and organisations.

Any personal information you include in this form will be handled and used by (or made available to) the following recipients to record, analyse and report on the feedback we receive:

- National Grid
- the Planning Inspectorate (which will administer our application for consent to build the project any details published as part of this process will be anonymised)
- the Secretary of State (who will take the decision on our application)
- our legal advisers
- consultants working on the project.

What rights do I have over my personal data?

Under the terms of the UK GDPR you have certain rights over how your personal data is retained and used by National Grid. For more information, see our full data privacy statement: https://www.nationalgrid.com/privacy-policy

Norwich to Tilbury Landowner Consultation Summer 2025 Feedback questionnaire

Norwich to Tilbury is a proposal for a new electricity transmission connection. It will play an important part in connecting new sources of more affordable, low carbon electricity from where it is generated to where it is needed.

From April to July 2024, we held a statutory public consultation, inviting local communities to share their views on our proposals. Furthermore, between 30 January and 17 April 2025 we undertook both statutory and non-statutory targeted consultations with landowners and local communities in certain locations along the route. We have carefully reviewed all the feedback and have identified some locations where we are minded to make changes to the proposals published to date.

As a result of these changes, we believe our project order limits will extend into a section of your land and would like to invite you to provide further feedback on our proposals.

Responding to the consultation

As a person with an interest in land, we would welcome any feedback you might have on how the proposed changes may impact your land interest as well as any comments on the proposed Project.

The deadline for submitting feedback is 11:59pm 18 July 2025.

Meeting

We encourage recipients of this letter to arrange a meeting with Fisher German (booking by telephone 0808 1753 314 or by email Norwich-Tilbury@fishergerman.co.uk). This meeting can be held on Microsoft Teams (or equivalent), by telephone or face-to-face.

Email

Responses to this consultation via the feedback questionnaire or free text response, can be submitted via email to Norwich-Tilbury@fishergerman.co.uk.

Post

A freepost envelope has been included in the pack of materials you have been sent so that you can return the second page of this questionnaire to us by post.

Alternatively, you can use a different envelope addressed to **FREEPOST N TO T** (please write this in capitals, you do not need a stamp).

For more information on how our proposals have been developed and to view information published during previous consultations, please see our project website www.nationalgrid.com/norwich-to-tilbury

Data Privacy

Please refer to the separate enclosure with this pack.

Norwich to Tilbury Targeted Landowner Consultation (Category 3 Interests) Summer 2025 Feedback questionnaire

Norwich to Tilbury is a proposal for a new electricity transmission connection. It will play an important part in connecting new sources of more affordable, low carbon electricity from where it is generated to where it is needed.

From April to July 2024, we held a statutory public consultation, inviting local communities to share their views on our proposals. Furthermore, between 30 January and 17 April 2025 we undertook both statutory and non-statutory targeted consultations with landowners and local communities in certain locations along the route. We have carefully reviewed all the feedback and have identified some locations where we are minded to make changes to the proposals published to date.

It has become apparent from our searches of the Land Registry, that you are in possession of a land interest which may be affected by part of the authorised development ("the project") at this stage. We do not anticipate at this stage that this land will be required for the project; but the future construction or operation of the proposed development may otherwise affect your land and property interests due to your proximity to the proposed development.

Responding to the consultation

As a person with an interest in land that <u>may</u> be indirectly impacted by the project, we would welcome any feedback you might have on the proposed project.

The deadline for submitting feedback is 11:59pm 22 August 2025.

Email

Responses to this consultation via the feedback questionnaire or free text response, can be submitted via email to Norwich-Tilbury@fishergerman.co.uk.

Post

A freepost envelope has been included in the pack of materials you have been sent so that you can return the second page of this questionnaire to us by post.

IMPORTANT: THIS COMMUNICATION AFFECTS YOUR PROPERTY

Dear [Name]

Proposed Norwich to Tilbury Project: Application for Development Consent

We have recently become aware that you may own, occupy or have a legal interest in land that could be affected by National Grid Electricity Transmission plc's ("National Grid") proposed Norwich to Tilbury Project (the "proposed Project"). As such, you may not have received a letter from National Grid informing you of previous statutory consultations for the Project and explaining how you can provide comments on the Project.

We are writing to you in relation to National Grid's proposed application for an order granting development consent to construct and operate the project called Norwich to Tilbury ("the Project").

The Project is a Nationally Significant Infrastructure Project (NSIP), and National Grid is seeking development consent under statutory procedures set by government. NSIPs are projects of certain types, over a certain size, which are considered by the government to be of national importance, hence permission to build them needs to be given at a national level, by the relevant Secretary of State (in this case the Secretary of State for Energy Security and Net Zero). Instead of applying to the local authority for planning permission, the developer must apply to the Planning Inspectorate for a Development Consent Order (DCO) that would grant development consent.

The development consent being sought would include a number of other provisions, including those for the compulsory acquisition of land and interests in and rights over land, overriding easements and other rights, the temporary use of land, and other ancillary powers, if necessary, to construct and maintain the Project.

The Project is an Environmental Impact Assessment ("EIA") development, as defined by the EIA Regulations and is currently in the pre-application stage of the DCO application process.

Project Description

- 1. The Project is a proposal by National Grid to upgrade the electricity transmission system in East Anglia between Norwich and Tilbury, comprising:
 - A new 400 kilovolt (kV) electricity transmission connection of approximately 180 km overall length from Norwich Main Substation to Tilbury Substation via Bramford Substation, a new East Anglia Connection Node (EACN) Substation and a new Tilbury North Substation, including:
 - Approximately 159 km of new overhead line supported on approximately 509 pylons, either standard steel lattice pylons (approximately 50 m in height) or low height steel lattice pylons (approximately 40 m in height) and some of which would be gantries (typically up to 15 m in height) within proposed Cable Sealing End (CSE) compounds or existing or proposed substations
 - Approximately 21 km of 400 kV underground cabling, some of which would be located through the Dedham Vale National Landscape (an Area of Outstanding Natural Beauty (AONB¹)

- Up to seven new CSE compounds (with permanent access) to connect the overhead lines to the underground cables
- Modification works to connect into the existing Norwich Main Substation and a substation extension at the existing Bramford Substation
- A new 400 kV substation on the Tendring Peninsula, referred to as the EACN Substation (with a new permanent access). This is proposed to be an Air Insulated Switchgear (AIS) substation
- A new 400 kV substation to the south of Orsett Golf Course in Essex, referred to as the Tilbury North Substation (with a new permanent access). This is proposed to be a Gas Insulated Switchgear (GIS) substation
- Modifications to the existing National Grid Electricity Transmission overhead lines to facilitate
 the connection of the existing network into the new Tilbury North Substation to provide
 connection to the Tilbury Substation
- Ancillary and/or temporary works associated with the construction of the Project.
- 2. In addition, third party utilities diversions and/or modifications would be required to facilitate the construction of the Project. There would also be land required for environmental mitigation and Biodiversity Net Gain (BNG).
- 3. As well as the permanent infrastructure, land would also be required temporarily for construction activities including, for example, working areas for construction equipment and machinery, site offices, welfare, storage and temporary construction access.
- 4. The Project would be designed, constructed and operated in accordance with applicable health and safety legislation. The Project will need to comply with design safety standards including the Security and Quality of Supply Standard (SQSS), which sets out the criteria and methodology for planning and operating the National Electricity Transmission System (NETS). This informs a suite of National Grid policies and processes, which contain details on design standards required to be met when designing, constructing and operating assets such as those proposed for the Project.

Further information on the Project

Further general information on the Project and copies of our previous consultation materials can be found on our website at: nationalgrid.com/norwich-to-tilbury

The 'Document Library' tab on the Project website includes all information related to the Project that has previously been consulted on and which remains relevant. This includes material published as part of the summer 2024 statutory consultation:

- Project Background Document
- Copy of the notice published as part of the summer 2024 statutory consultation under Section 48 of the Act (as the Project is 'EIA Development' for the purposes of the EIA Regulations and as required by Regulation 4 of the APFP Regulations)
- 2024 PEIR and non-technical summary of the 2024 PEIR
- Project maps/Project area maps showing the extent of the Project
- Statement of Community Consultation

Material published during targeted consultations in 2025:

- Targeted Statutory Consultation Strategy
- Targeted Consultation Strategy
- Targeted consultation feedback questionnaire
- Targeted consultation overview map
- Consultation leaflet for each of the targeted consultation locations
- Environmental Impacts of Change document for each of the targeted consultation locations

Please note that the consultation documents on our website refer to deadlines for responding. These deadlines do not apply to any responses you wish to send to us in respect of this letter.

Although the period to respond to the consultation for the Project has now passed, you will still have the opportunity to register your interest to participate in the examination of the application for development

consent once the application is made. National Grid intends to shortly submit the application for development consent to the Planning Inspectorate. Should the Planning Inspectorate accept the application for examination, we will send you a letter explaining how to register your interest to participate in the examination and make representations (giving notice of your interest in, or comments in respect of National Grid's application for the Project).

Please get in touch with us if you have any questions about this letter.

Telephone: 0808 1753 314

Email: Norwich-Tilbury@fishergerman.co.uk

Post: Alternatively, you can write to us via **FREEPOST N TO T**

(please write this in capitals, you do not need a stamp)

Next Steps

Whilst the pre-application consultation stages have now concluded, there will be an opportunity for you to give your views on our proposals, once our application has been submitted. You would make these comments directly to the Planning Inspectorate whilst our application is being examined.

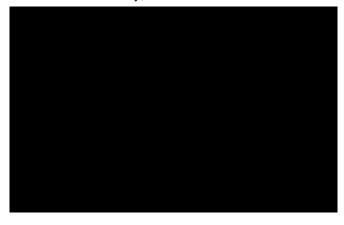

Insofar as you make any additional representations to us directly, we may be required to make copies of representations available to the Secretary of State. However, we will request that personal details are not placed on the public record. Personal details will be held securely in accordance with the relevant data protection legislation and will be used solely in connection with the consultation process and the development of this Project and, except as noted above, will not be disclosed to any third parties.

National Grid's privacy policy can be found on its website: https://www.nationalgrid.com/privacy-policy.

If you have any questions about the Project, please do not hesitate to contact us at the above postal or email address.

We look forward to hearing from you.

Yours sincerely,

Appendix L7.2

IMPORTANT: THIS COMMUNICATION AFFECTS YOUR PROPERTY

Dear [Name]

Proposed Norwich to Tilbury Project: Application for Development Consent

We have recently become aware that you may be in possession of a land interest which may be indirectly affected by part of National Grid Electricity Transmission plc's ("National Grid") proposed Norwich to Tilbury Project (the "proposed Project"). As such, you may not have received a letter from National Grid informing you of previous statutory consultations for the Project and explaining how you can provide comments on the Project.

We are writing to you in relation to National Grid's proposed application for an order granting development consent to construct and operate the project called Norwich to Tilbury ("the Project"). Specifically, we are now writing to you as a potential Category 3 interest under section 44 of the Planning Act 2008 ("the Act").

The Project is a Nationally Significant Infrastructure Project (NSIP), and National Grid is seeking development consent under statutory procedures set by government. NSIPs are projects of certain types, over a certain size, which are considered by the government to be of national importance, hence permission to build them needs to be given at a national level, by the relevant Secretary of State (in this case the Secretary of State for Energy Security and Net Zero). Instead of applying to the local authority for planning permission, the developer must apply to the Planning Inspectorate for a Development Consent Order (DCO) that would grant development consent.

The development consent being sought would include a number of other provisions, including those for the compulsory acquisition of land and interests in and rights over land, overriding easements and other rights, the temporary use of land, and other ancillary powers, if necessary, to construct and maintain the Project.

The Project is an Environmental Impact Assessment ("EIA") development, as defined by the EIA Regulations and is currently in the pre-application stage of the DCO application process.

A Category 3 interest relates to persons/organisations whose land, **whilst not necessarily directly affected by part of the authorised development** ("the proposed Project"), may be entitled to make a relevant claim for compensation, if development consent for the Norwich to Tilbury Project is granted, and the Development Consent Order is fully implemented.

A relevant claim means a claim under -

- section 10 of the Compulsory Purchase Act 1965
- part 1 of the Land Compensation Act 1973
- section 152(3) of the Planning Act

A land agent / surveyor / legal representative will be able to advise you on your entitlement to make a claim, and your rights as a potential Category 3 interest, in respect of the Planning Act 2008.

Project Description

- 1. The Project is a proposal by National Grid to upgrade the electricity transmission system in East Anglia between Norwich and Tilbury, comprising:
 - A new 400 kilovolt (kV) electricity transmission connection of approximately 180 km overall length from Norwich Main Substation to Tilbury Substation via Bramford Substation, a new East Anglia Connection Node (EACN) Substation and a new Tilbury North Substation, including:
 - Approximately 159 km of new overhead line supported on approximately 509 pylons, either standard steel lattice pylons (approximately 50 m in height) or low height steel lattice pylons (approximately 40 m in height) and some of which would be gantries (typically up to 15 m in height) within proposed Cable Sealing End (CSE) compounds or existing or proposed substations
 - Approximately 21 km of 400 kV underground cabling, some of which would be located through the Dedham Vale National Landscape (an Area of Outstanding Natural Beauty (AONB¹)
 - Up to seven new CSE compounds (with permanent access) to connect the overhead lines to the underground cables
 - Modification works to connect into the existing Norwich Main Substation and a substation extension at the existing Bramford Substation
 - A new 400 kV substation on the Tendring Peninsula, referred to as the EACN Substation (with a new permanent access). This is proposed to be an Air Insulated Switchgear (AIS) substation
 - A new 400 kV substation to the south of Orsett Golf Course in Essex, referred to as the Tilbury North Substation (with a new permanent access). This is proposed to be a Gas Insulated Switchgear (GIS) substation
 - Modifications to the existing National Grid Electricity Transmission overhead lines to facilitate
 the connection of the existing network into the new Tilbury North Substation to provide
 connection to the Tilbury Substation
 - Ancillary and/or temporary works associated with the construction of the Project.
- 2. In addition, third party utilities diversions and/or modifications would be required to facilitate the construction of the Project. There would also be land required for environmental mitigation and Biodiversity Net Gain (BNG).
- 3. As well as the permanent infrastructure, land would also be required temporarily for construction activities including, for example, working areas for construction equipment and machinery, site offices, welfare, storage and temporary construction access.
- 4. The Project would be designed, constructed and operated in accordance with applicable health and safety legislation. The Project will need to comply with design safety standards including the Security and Quality of Supply Standard (SQSS), which sets out the criteria and methodology for planning and operating the National Electricity Transmission System (NETS). This informs a suite of National Grid policies and processes, which contain details on design standards required to be met when designing, constructing and operating assets such as those proposed for the Project.

Further information on the Project
