1. Introduction

1.1 Overview

- 1.1.1 This draft Statement of Common Ground (SoCG) has been prepared relating to the application for development consent for the proposed Norwich to Tilbury project (the 'Project') made by National Grid Electricity Transmission plc (referred to as 'National Grid' within this document). It has been prepared in accordance with the guidance published by the Department of Communities and Local Government (Department for Communities and Local Government, 2015).
- 1.1.2 This SoCG has been prepared by National Grid as the Applicant and Basildon Borough Council (BBC). Basildon Borough Council is a prescribed consultee under Section 43 of the Planning Act 2008 (PA 2008) as a Host Authority.
- 1.1.3 This SoCG does not seek to replicate information which is available elsewhere within the application documents. All documents are available in the deposit locations and /or the Planning Inspectorate website.
- 1.1.4 This SoCG has been produced to confirm to the Examining Authority (ExA) where agreement has been reached between the parties. It identifies areas of the Project within the Development Consent Order (DCO) application ('the Application'), where matters are agreed, under discussion or not agreed between the parties.
- 1.1.5 The engagement between the parties across the breadth of matters is ongoing. The SoCG is an evolving document and detailed wording within it is still being discussed between the parties.
- 1.1.6 This draft SoCG has been prepared at an early phase of the DCO process, ahead of submission. It is intended to be a live and working document which will be updated as the Project progresses and shared with BBC at key points for discussion.
- 1.1.7 Future iterations will evolve from this point and all parties reserve the right to supplement the matters identified as we progress the discussions to ensure it is comprehensive. There are many items within it that although not currently agreed have the potential to be resolved. A final SoCG will be prepared ahead of the close of the DCO Examination. Unlike a final SoCG, this draft SoCG has not been officially signed by either party.
- 1.1.8 The parties will continue to work together, seeking resolution where appropriate to ensure this SoCG is a reliable and up to date document which can inform the examination.
- 1.1.9 This SoCG has been structured to reflect topics of the Application which are relevant to BBC. The applicable matters considered within this SoCG apply to BBC's statutory remit. The following bullet points present the topics included in this SoCG (they are also presented in Section 3):
- Project development, description and design
 - Ecology and Biodiversity
 - Air Quality

- Noise and Vibration
- Health and Wellbeing
- Historic Environment
- Landscape and Visual
- Socio-economics, Recreation and Tourism
- Cumulative Effects
- Development Consent Order
- Other Matters

Basildon Borough Council will have regard to any points raised by statutory bodies and other relevant Interested Parties in respect of the matters covered in the SoCG. Therefore, this version reflects the current position of Basildon Borough Council but may be subject to change during the examination. A final position will be recorded in the final SoCG to be submitted close to the examination.

1.2 Project Description

- 1.2.1 The Project is a proposal by National Grid to upgrade the electricity transmission system in East Anglia between Norwich and Tilbury, comprising:
- A new 400 kilovolt (kV) electricity transmission connection of approximately 180 km overall length from Norwich Main Substation to Tilbury Substation via Bramford Substation, a new East Anglia Connection Node (EACN) Substation and a new Tilbury North Substation, including:
 - Approximately 159 km of new overhead line supported on approximately 509 pylons, either standard steel lattice pylons (approximately 50 m in height) or low height steel lattice pylons (approximately 40 m in height) and some of which would be gantries (typically up to 15 m in height) within proposed Cable Sealing End (CSE) compounds or existing or proposed substations
 - Approximately 21 km of 400 kV underground cabling, some of which would be located through the Dedham Vale National Landscape (an Area of Outstanding Natural Beauty (AONB1))
 - Up to seven new CSE compounds (with permanent access) to connect the overhead lines to the underground cables
 - Modification works to connect into the existing Norwich Main Substation and a substation extension at the existing Bramford Substation
 - A new 400 kV substation on the Tendring Peninsula, referred to as the EACN Substation (with a new permanent access). This is proposed to be an Air Insulated Switchgear (AIS) substation
 - A new 400 kV substation to the south of Orsett Golf Course in Essex, referred to as the Tilbury North Substation (with a new permanent access). This is proposed to be a Gas Insulated Switchgear (GIS) substation
 - Modifications to the existing National Grid Electricity Transmission overhead lines to facilitate the connection of the existing network into the new Tilbury North Substation to provide connection to the Tilbury Substation

- Ancillary and/or temporary works associated with the construction of the Project.
- 1.2.2 In addition, third party utilities diversions and/or modifications would be required to facilitate the construction of the Project. There would also be land required for environmental mitigation and Biodiversity Net Gain (BNG).
- 1.2.3 As well as the permanent infrastructure, land would also be required temporarily for construction activities including, for example, working areas for construction equipment and machinery, site offices, welfare, storage and temporary construction access.
- 1.2.4 The Project would be designed, constructed and operated in accordance with applicable health and safety legislation. The Project will need to comply with design safety standards including the Security and Quality of Supply Standard (SQSS), which sets out the criteria and methodology for planning and operating the National Electricity Transmission System (NETS). This informs a suite of National Grid policies and processes, which contain details on design standards required to be met when designing, constructing and operating assets such as those proposed for the Project.

1.3 Format and Structure of this Document

- 1.3.1 This SoCG is structured as follows:
- **Section 2** provides a summary of the key engagement undertaken to date with BBC
 - **Section 3** summarises the key matters and captures the status of each issue / matter
 - **Section 4** includes the sign off sheet

2. Record of Key Engagement

2.1 Introduction

2.1.1 National Grid has engaged with Basildon Borough Council on the Project throughout the pre-application process. This has included:

- Non-statutory consultation in Spring 2022 and Summer 2023
- Statutory consultation in Spring 2024
- Targeted consultations in Spring 2025
- Regular meetings with lead officers about the Project as a whole
- Regular ‘Thematic Group’ meetings bringing together host authorities to discuss specific topics
- One to one / small group technical meetings on specific detailed matters
- Sharing of papers and documentation at key stages

2.1.2 Further details on National Grid’s engagement with stakeholders is provided in the Consultation Report and the Environmental Statement.

2.2 Summary of Key Engagement

2.2.1 Table 2.1 provides an overview of the key engagement that has taken place between National Grid and BBC.

2.2.2 It is agreed that the below is an accurate record of the key meetings and consultation undertaken between National Grid and BBC in relation to the issues addressed in this SoCG.

Table 2.1 Summary of Key Engagement between National Grid and Basildon Borough Council

Date	Format	Topic/Description
General		
June 2022	Meeting	Informal project catch-up and consultation feedback with BBC.
September 2022	Meeting	All host authority workshop.
November 2022	Meeting	Briefings on issued response to questions from OffSET with all host authorities.
November 2022	Meeting	All host authority workshop.
January 2023	Meeting	All host authority workshop.

Date	Format	Topic/Description
February 2023	Meeting	Pre-consultation session with all host authorities.
March 2023	Meeting	All host authority workshop.
May 2023	Meeting	All host authority workshop.
June 2023	Meeting	Non-statutory consultation preferred alignment briefing to all host authorities.
July 2023	Meeting	Dunton Hills Garden Village discussion.
July 2023	Meeting	All host authority workshop.
September 2023	Meeting	All host authority workshop.
October 2023 - Ongoing	Meeting	Monthly informal catch-up meetings.
November 2023	Meeting	All host authority workshop.
December 2023	Meeting	Dunton Hills Garden Village discussion.
December 2023	Email Correspondence	National Grid issued the draft Statement of Community Consultation (SoCC) to all host authorities for comment.
January 2024	Meeting	All host authority workshop.
February 2024	Meeting	Statutory consultation preferred alignment briefing to all host authorities.
March 2024	Meeting	All host authority workshop.
March 2024	Email Correspondence	National Grid issued the SoCC to all host authorities for statutory consultation.
May 2024	Meeting	All host authority workshop.
September 2024	Email Correspondence	National Grid issued the draft Outline Code of Construction Practice (CoCP) to all host authorities for comment.
October 2024	Meeting	National Grid held a meeting to discuss comments from stakeholders on draft versions of the Outline Landscape and Ecological Management Plan (LEMP) and Outline CoCP.
November 2024	Meeting	Meeting to discuss approach to targeted consultation
November 2024	Meeting	All host authority workshop
January 2025	Meeting	Meeting to provide project and design update
January 2025	Meeting	All host authority workshop
March 2025	Meeting	All host authority workshop

Date	Format	Topic/Description
May 2025	Meeting	All host authority workshop
June 2025	Meeting	Meeting to discuss Statement of Common Ground
Ecology and Biodiversity		
July 2022	Email Correspondence	National Grid shared the Biodiversity Assessment Methodology and Arboriculture Assessment Methodology for review ahead of the Thematic Group meeting.
July 2022	Meeting	Ecology and Biodiversity Thematic Group meeting - National Grid presented on the Biodiversity Assessment Methodology and Arboriculture Assessment Methodology and sought feedback from BBC and other authorities.
September 2023	Meeting	National Grid discussed the potential off-site scheme/initiatives for BNG.
March 2024	Meeting	Biodiversity Thematic Group to discuss the methodology and scope of ecology surveys outside the remit of Natural England.
May 2024	Technical Note	National Grid issued a technical note to all host authorities outlining survey methods and the scope of surveys for species outside the remit of Natural England for agreement / comment.
May 2024	Meeting	Optional Thematic Group call.
September 2024	Email Correspondence	National Grid shared the Outline Landscape and Ecological Management Plan (oLEMP)
October 2024	Meeting	National Grid hosted a meeting to discuss comments from stakeholders on draft versions of the Outline LEMP and CoCP.
January 2025	Email Correspondence	National Grid issued the Protected Species Proposed Mitigation Measures to stakeholders including BBC.
January 2025	Meeting	National Grid hosted a meeting to discuss comments from stakeholders on proposed mitigation for species outside the remit of Natural England.
January 2025	Email Correspondence	National Grid shared the Biodiversity Net Gain BNG Strategy.
January 2025	Meeting	National Grid hosted a meeting to discuss comments received on the draft Biodiversity Net Gain Report.

Date	Format	Topic/Description
January 2025	Meeting	National Grid hosted a meeting to discuss comments from stakeholders on the second iteration of the Outline LEMP and Outline CoCP.
May 2025	Meeting	National Grid hosted a meeting to discuss comments from the updated proposed mitigation for species outside the remit of Natural England.
Air Quality		
September 2022	Email Correspondence	National Grid issued the proposed methodology and scope of the Air Quality assessment for review and comment.
Noise and Vibration		
September 2022	Email Correspondence	National Grid issued the proposed methodology and scope of the Noise and Vibration assessment for review and comment.
Health and Wellbeing		
September 2022	Email Correspondence	National Grid issued the Health and Wellbeing Assessment Methodology to all host authorities.
September 2024	Meeting	National Grid held a meeting to discuss and agree the proposed assessment scope and methodology for the Health and Wellbeing chapter of the ES.
October 2024	Technical note	National Grid issued a refreshed Health and Wellbeing technical note on the proposed approach to the Environmental Impact Assessment (EIA), including guidance, study area, scope, and assessment methodology.
Historic Environment		
July 2022	Email Correspondence	National Grid issued a document detailing the scope and methodology for the Historic Environment assessment and baseline to all host authorities and Historic England.
July 2022	Meeting	Historic Environment Thematic Group to discuss the proposed approach for the EIA assessment.
September 2022	Meeting	National Grid presented an updated approach to defining study areas, scoping of walkover and scoping of historic buildings to consider in the assessment, in response to feedback received.
January 2023	Email Correspondence	National Grid issued the plans showing the proposed viewpoint locations for landscape and heritage ahead of the Thematic Group meeting in February 2023 to all host authorities.

Date	Format	Topic/Description
February 2023	Meeting	National Grid held a meeting with all host authorities to discuss landscape and heritage viewpoints.
June 2023	Technical Note	National Grid issued a technical note to Historic England and host authorities to agree methodology for the selection of viewpoints for the Historic Environment assessment.
September 2023	Meeting	Historic Environment Thematic Group meeting to discuss the proposed heritage viewpoint methodology with all host authorities and Historic England.
November 2023	Meeting	Historic Environment Thematic Group meeting to discuss the proposed locations of heritage viewpoints with host authorities and Historic England. Feedback was received from stakeholders regarding proposed viewpoints and additional viewpoints were proposed.
November 2023	Meeting	Historic Environment Thematic Group meeting to discuss proposed locations of heritage viewpoints with all host authorities and Historic England. Viewpoint locations shared in PDF and shapefile.
January 2024	Email Correspondence	National Grid shared the updated viewpoints (including ZTV) for feedback from all host authorities, Natural England and Historic England.
March 2024	Technical Note	National Grid shared the Historic Environment Desk-Based Assessment for review and comment.
May 2024	Meeting	Optional Statutory Consultation Thematic Group call.
February 2025	Meeting	Thematic Group meeting to discuss the Historic Environment Viewpoints.
February 2025	Meeting	National Grid Hosted a meeting to discuss the Heritage Baseline report.
March 2025	Email Correspondence	National Grid issued updated the Historic Environment Viewpoints information to stakeholders including BBC.
March 2025	Email Correspondence	National Grid issued the Draft Outline Archaeological Mitigation Strategy and Draft Outline Written Scheme of Investigation (WSI) for post-consent stage of the project.

Date	Format	Topic/Description
Landscape and Visual		
July 2022	Meeting	Landscape and Visual Thematic Group Meeting. National Grid shared the Landscape and Visual Impact Assessment (LVIA) Methodology and Arboricultural Assessment Methodology for review.
January 2023	Email Correspondence	National Grid issued plans showing proposed viewpoint locations for review and comment to all host authorities.
April 2023	Meeting	National Grid held a meeting to discuss stakeholder's feedback on EIA viewpoints previously shared.
May 2023	Meeting	National Grid presented and discussed the responses to the feedback on the viewpoint locations received from the February meeting (covering both heritage and landscape viewpoints). Stakeholders provided feedback on updated and additional viewpoint locations at the meeting and in subsequent correspondence.
May 2023 – March 2024	Email Correspondence	National Grid shared information, responded to further feedback on viewpoint locations received from the May 2023 meeting, and reviewed subsequent feedback received up to March 2024 with the aim to agree viewpoint locations for the PEIR and ES (based on the information available at this date).
August 2023	Email Correspondence	National Grid issued wirelines and photomontages and proposed the approach to Zone of Theoretical Visibility (ZTV) mapping for comment.
January 2024	Email Correspondence	National Grid shared the updated landscape viewpoints (and the ZTV) and sought feedback from all host authorities.
May 2024	Meeting	Optional Statutory Consultation Thematic Group call.
September 2024	Email Correspondence	National Grid shared the Draft Landscape and Visual Methodology, Proposed LVIA Viewpoints (excel spreadsheet) and Proposed LVIA Viewpoints (map) ahead of the Landscape Thematic Group Meeting.
September 2024	Meeting	National Grid held a Landscape Thematic Group Meeting to find agreement on the LVIA methodology and the format/presentation of

Date	Format	Topic/Description
		photomontages and/or wirelines which will form part of the DCO application.
September 2024	Meeting	Landscape and Visual Thematic Group Meeting – LVIA Viewpoints within Essex South and Thurrock VPs.
October 2024	Email Correspondence	National Grid shared the shapefiles for the landscape viewpoints and order limits with BBC and other stakeholders following the Landscape Thematic Group Meeting.
October 2024	Email Correspondence	National Grid shared the draft Outline LEMP and Sample Mitigation Drawings ahead of the draft Outline LEMP and Outline CoCP discussion.
October 2024	Meeting	National Grid held a meeting to discuss comments from stakeholders on draft versions of the Outline LEMP and CoCP.
October 2024	Email Correspondence	National Grid shared the Draft mitigation drawings with stakeholders
October 2024	Email Correspondence	National Grid shared updated viewpoint information data following from the landscape thematic workshops
November 2024	Meeting	Thematic group meeting to discuss viewpoints and methodology.
March 2025	Email Correspondence	National Grid issued an update on LVIA Viewpoints and Methodology.
Socio-economics, Recreation and Tourism		
July 2022	Email Correspondence	National Grid issued the assessment methodology to stakeholders for review ahead of the Thematic Group Meeting in July 2022.
July 2022	Meeting	National Grid held a Socio-economic, Recreation and Tourism Thematic Group Meeting to seek feedback on the proposed approach to the Socio-economics, Recreation and Tourism assessment prior to formal submission of the Scoping Report to the Planning Inspectorate. This meeting was attended by several stakeholders, including BBC.
June 2023	Technical Note	National Grid issued a Technical Note setting out the study area and methodology for assessing businesses where visual impacts are a potential operational consideration, and Public Right of Way (PRoW) during construction and operation.

Date	Format	Topic/Description
August 2023	Meeting	National Grid held a Socio-economic, Recreation and Tourism Thematic Group Meeting to discuss the study area and methodology for assessing businesses.
April 2024	Technical Note	National Grid shared an updated technical note with all host authorities to demonstrate how their feedback had been considered in developing the PEIR.
September 2024	Meeting	Meeting to discuss and agree the Scope and Methodology for the updated Socio-economics, Recreation and Tourism Technical note on the ES Chapter.
September 2024	Technical Note	National Grid shared the Socio-economic, Recreation and Tourism technical note with stakeholders.
November 2024	Meeting	National Grid held a follow up meeting to discuss and agree the Scope and Methodology for the updated Socio-economics, Recreation and Tourism Technical note on the ES Chapter.

3. Matters Agreed, Not Agreed or Under Discussion

3.1 Overview

- 3.1.1 This chapter details the matters relevant to Basildon Borough Council which have been agreed, not agreed or are under discussion between the parties. Matters are arranged by topic (using broad headings, or EIA chapter headings where appropriate) and each matter is given a unique reference number to aid identification.
- 3.1.2 The red, amber, green status shows the level of agreement with BBC. Descriptions of the different levels are summarised in Table 3.1.

Table 3.1 Agreement status for matters presented in Section 3

Status	Description
Not Agreed	Indicates a final position, where it has not been possible to resolve the issue to the agreement of both parties and there remains a difference of opinion.
Under Discussion	Indicates where issues are the subject of active on-going discussion.
Agreed	Indicates where an issue has been agreed or resolved satisfactorily to the agreement of both parties.

- 3.1.3 Engagement will continue as the Project develops and progresses through the various stages of the DCO process.
- 3.1.4 Sections that remain highlighted in yellow within these tables show points where both parties will seek to discuss and where possible agree a position in due course. The parties have been unable to do so at this stage because the relevant information is still being authored ahead of submission of the DCO application. These points will be the subject of ongoing discussion with stakeholders once the Environmental Statement and other relevant documentation is published.
- 3.1.5 Table 3.3 to 3.11 provides the matters agreed, not agreed or under discussion in relation to the various topics.

3.2 Project development, description and design

Table 3.2 Matters Agreed, Not Agreed or Under Discussion in relation to project development, description and design matters

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
Strategic options/needs case				
3.2.1	Needs case	<p>Norwich to Tilbury is being proposed because the existing network in East Anglia doesn't have sufficient capacity to manage the expected (and in some cases, contracted) increase in offshore wind farms (and interconnectors) needing to connect to the grid as part of the Government's target of reaching net zero by 2050. The project sits alongside other work to reinforce and upgrade the existing network in East Anglia.</p> <p>Norwich to Tilbury is listed as a key project in Appendix 2 of the NESO Clean Power 2030 Report.</p>	<p>BBC Response to Targeted Consultations (March 2025):</p> <p>Basildon Council has always acknowledged that the grid capacity offered by the Norwich to Tilbury project is needed. National Grid's own Strategic Options Backcheck and Review (April 2024), as well as ongoing liaison with the project team and earlier consultation material have sufficiently made the case for the project.</p>	Agreed
3.2.2	Project timing	<p>Timing for the project is driven by the needs case – when offshore wind farms are contracted to connect to the UK network – the first of which are contracted to connect in 2030. National Grid is legally obliged (under our Transmission Owner License) to provide capacity at the dates formally agreed in contracts with energy generators (or customers) by NESO.</p> <p>Appendix 2 of the NESO Clean Power 2030 Report shows that the constraint costs associated with a delay to the</p>	<p>BBC Response to Targeted Consultations (March 2025):</p> <p>It remains unclear why the project must be in place by 2030/31, as the ESO study also found that undergrounded High Voltage Direct Current would be cost comparable to overhead pylons assuming a 2034 completion date. Overall, the latter date may still prove to be a better option given the greater efficiency of this approach.</p>	Under discussion

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
3.2.3	Onshore route	<p>project timing as being between £2.7 and £2.8 billion.</p> <p>An onshore route allows for greater energy capacity and connectivity to feed into the grid. In assessing offshore options to deliver the same capacity as an onshore overhead line, we would need to build three subsea cables and associated infrastructure, which would add significant cost and not meet the needs case for Norwich to Tilbury.</p> <p>Updated Strategic Options and Backcheck Review documents published at each consultation compare the environmental, technical, socioeconomic and financial implications for alternative routes, including offshore alternatives.</p>	<p>BBC Response to Targeted Consultations (March 2025):</p> <p>BBC believe credible alternatives to overhead transmission lines, such as an offshore centered approach or HVDC Undergrounding, delivered at pace, to minimise onshore infrastructure should be explored fully</p>	Under discussion
3.2.4	Predominantly overhead line route	<p>Norwich to Tilbury has been designed in line with policy statement EN-5 (which covers the development of new energy infrastructure) which concludes that in most cases, the government expects that overhead lines will be appropriate and should be used as standard to reinforce the grid.</p> <p>Updated Strategic Options and Backcheck Review documents published at each consultation compare the environmental, technical, socioeconomic and financial implications</p>	<p>BBC Response to Targeted Consultations (March 2025):</p> <p>BBC believe credible alternatives to overhead transmission lines, such as an offshore centered approach or HVDC, undergrounding, delivered at pace, to minimise onshore infrastructure should be explored fully.</p>	Under discussion

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
		<p>for alternative routes, including underground alternatives.</p> <p>The work undertaken shows that undergrounding, including using HVDC cables, would be significantly more expensive and have environmental impacts and present engineering challenges. Due to the higher price that would be involved in an underground alternative, we do not believe that this would be the most suitable option as all costs ultimately go onto domestic energy bills.</p>		

Project development process - Design

Project development process - Consultation

3.2.5	2022 non-statutory consultation	<p>Non-statutory consultation took place between 21 April 2022 – 16 June 2022. Details of this consultation are outlined in the Consultation Strategy, and responses to feedback received during consultation are included in the Feedback Report.</p> <p>The non-statutory consultation was undertaken in accordance with the published Consultation Strategy.</p>		Under discussion
3.2.6	2023 non-statutory consultation	<p>Non-statutory consultation took place between 27 June 2023 – 21 August 2023. Details of this consultation are outlined in the Consultation Strategy, and responses to feedback received</p>		Under discussion

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
		<p>during consultation are included in the Feedback Report.</p> <p>The non-statutory consultation was undertaken in accordance with the published Consultation Strategy.</p>		
3.2.7	2024 statutory consultation	<p>Statutory Consultation took place from Wednesday 10 April 2024 to 26 July 2024 (the end date was extended from 18 June 2024 due to the general election.) Details of this consultation are outlined in the SoCC. Responses to feedback received during statutory consultation will be made available at DCO submission within the Consultation Feedback Report.</p> <p>The statutory consultation was undertaken in accordance with the published SoCC.</p>		Under discussion
3.2.8	2025 targeted consultation	<p>Targeted consultations for Essex took place from 25 February 2025 – 27 March 2025. Details of these consultations are outlined in the Targeted Consultation Strategy and associated targeted consultation leaflets and environmental implications of change documents. Responses to feedback received during targeted consultation will be made available at DCO submission within the Consultation Feedback Report.</p> <p>The targeted consultations were undertaken in accordance with the</p>		Under discussion

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
		<p>published Targeted Consultation Strategy.</p> <p>The approach to targeted consultation was undertaken in accordance with Section 50 of the Planning Act 2008 and associated guidance: Planning Act 2008: Pre-application stage for Nationally Significant Infrastructure Projects (April 2024).</p>		
Other matters as required				
3.2.9	Community Benefits	<p>In March 2025 the government announced guidance for delivering community benefit packages for communities hosting new, onshore transmission infrastructure projects. This guidance is clear that community benefit matters should be separate from, and not a material consideration in, the planning process. Outside of the DCO process, National Grid will work with stakeholders to understand the opportunity and delivery of this funding, in line with guidance.</p>		Under discussion
3.2.10	Impact on future housing allocations	<p>National Grid has taken into consideration the location of planning applications and housing allocations in establishing the baseline as part of the routeing and siting studies to minimise any potential for direct impacts on housing development site, where possible. At all stages in the development of the Project, National</p>	<p>BBC Response to Statutory Consultations (July 2024):</p> <p>National Grid's preferred solution of an overhead line poses questions for Basildon Borough Council's ability to propose site allocations in the west of Basildon borough in its new Local Plan, given the concerns which an overhead route raises around the ability to secure the necessary infrastructure</p>	Under discussion

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
		Grid has considered local plan allocations (both adopted and emerging) as well as planning applications along the route.	funding from new development. Uncertainties over the ability to propose allocations close to the Norwich to Tilbury route places issues on viability evidence which would identify an infrastructure funding gap. This, in turn, helps to influence viability and any identified gap could be significantly higher if the pylon route subsequently provokes a deterioration in house prices/land values close to the route.	

3.3 Ecology and Biodiversity

Table 3.3 Matters Agreed, Not Agreed or Under Discussion in relation to Ecology and Biodiversity

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
EIA – Regulatory, Planning Policy Context and Guidance				
3.3.1	Policy and legislation	The policy context, legislation and guidance considered when undertaking the Ecology and Biodiversity assessment is presented in Chapter 2 (Key Legislation and Planning Policy Context) and Section 8.2 of Chapter 8 (Ecology and Biodiversity) of the ES. All relevant legislation, policy and guidance has been identified and appropriately considered to inform the assessment.	Not yet seen the ES so cannot comment at this stage.	Under discussion

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
EIA – Approach and Methods				
3.3.2	Study area	The study area was agreed through the EIA Scoping Report and Scoping Opinion received from the Planning Inspectorate.	The study area was agreed through the EIA Scoping Report and Scoping Opinion received from the Planning Inspectorate.	Agreed
3.3.3	Data sources	Sufficient desktop and survey data has been collected to inform the assessment as presented within Section 8.4 of Chapter 8 (Ecology and Biodiversity) of the ES.	BBC position pending sight of the ES	Under discussion
3.3.4	Assessment Methodology	The assessment methodology was agreed through the EIA Scoping Report and Scoping Opinion received from the Planning Inspectorate.	The assessment methodology was agreed through the EIA Scoping Report and Scoping Opinion received from the Planning Inspectorate.	Agreed
3.3.5	Survey Methodology	National Grid issued a Technical Note in May 2024 outlining survey methods and the scope of surveys for species outside the remit of Natural England for agreement / comment. No comments received to date on the Technical Note from BBC, no comments received at Statutory Consultation, therefore it is assumed that this matter is agreed.	National Grid issued a Technical Note in May 2024 outlining survey methods and the scope of surveys for species outside the remit of Natural England for agreement / comment. No comments received to date on the Technical Note from BBC, no comments received at Statutory Consultation, therefore it is assumed that this matter is agreed.	Agreed
3.3.6	Key parameters and assumptions	Key parameters and assumptions associated with the Ecology and Biodiversity assessment are summarised in Section 8.4 of Chapter 8 (Ecology and Biodiversity) of the ES. The key parameters and assumptions presented are considered appropriate.	BBC position pending sight of the ES	Under discussion

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
EIA – Baseline Conditions				
3.3.7	Baseline conditions and receptors	The baseline conditions and receptors for Ecology and Biodiversity are presented in Section 8.5 of Chapter 8 (Ecology and Biodiversity) of the ES. The baseline conditions and receptors presented are considered appropriate.	BBC position pending sight of the ES	Under discussion
EIA – Embedded, Standard and Additional Mitigation Measures				
3.3.8	Embedded mitigation	Embedded mitigation measures, designed as an inherent part of the Project relevant to Ecology and Biodiversity effects, are set out in Section 8.6 of Chapter 8 (Ecology and Biodiversity) of the ES. Embedded mitigation is considered appropriate and adequate, in terms of its nature and scale, to address potential effects.	BBC position pending sight of the ES	Under discussion
3.3.9	Standard mitigation	Standard mitigation measures to reduce potential Ecology and Biodiversity effects during construction are summarised in Section 8.6 of Chapter 8 (Ecology and Biodiversity) of the ES and set out in the Outline CoCP [document reference 7.2.X]. The standard mitigation is considered appropriate and adequate, in terms of its nature and scale, to address potential effects.	CoCP comments are being provided by Essex Place Services (EPS) on behalf of all the Essex councils. The Council defers to that response.	Under discussion
3.3.10	Additional mitigation	The consideration of additional mitigation measures are presented in Section 8.6 of Chapter 8 (Ecology and Biodiversity) of the ES. Additional mitigation is considered appropriate and adequate, in terms of its	BBC position pending sight of the ES	Under discussion

3.9.1	Policy and legislation	<p>The policy context, legislation and guidance considered when undertaking the Socio-economics, Recreation and Tourism assessment is presented in Chapter 2 (Key Legislation and Planning Policy Context) and Section 15.2 of Chapter 15 (Socio-economics, Recreation and Tourism) of the ES.</p> <p>All relevant legislation, policy and guidance has been identified and appropriately considered to inform the assessment.</p>	Agreed - subject to further clarification on social value/community benefits information.	Agreed
EIA – Approach and Methods				
3.9.2	Study area	<p>The Scoping Opinion stated: <i>“The Applicant should seek to agree the study area with the relevant local authorities”</i>.</p> <p>A meeting was held on 14th November 2024 to seek to agree this point in the Scoping Opinion. Technical Notes were shared in June 2023 and April 2024.</p> <p>Following the meeting held on 14th November, it was agreed that the study area for businesses would be expanded from 1km to 3km to take into account potential visual effects on businesses.</p>	<p>Basildon Council responded to the Socio Economic & Tourism technical note consultation on 17 July 2023.</p> <p>A response to the non-technical Health note was also provided where BBC stated that the methodology should consider how the project will impact on health in respect of the following:</p> <p>Disruption to Green Space and Nature: assessing whether construction of the project could result in the loss of green space used for leisure and recreation purposes.</p>	Under discussion

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
		<p>A 3rd Technical Note is currently being prepared to seek to agree the study area and methodology, therefore this area is still under discussion.</p> <p>Regarding comments raised in response to the first iteration of the SoCG. BBC's comments are noted, and NG will continue to engage with BBC on this matter.</p>	<p>Traffic and Transport: Linking to the Council's full consultation response, will there be any possible human health effects e.g. physical injury from accidents due to more traffic on the roads, or increased congestion and driver stress?</p> <p>Water: Is there a risk of human health effects during construction if and where contaminants of groundwater enters the public water supply? How will this be prevented? Some consideration may need to be given to the new National Policy Statement on water, which came into force in September 2023.</p> <p>Soil contamination: Soil quality is linked to Nutrient Neutrality matters and thus the potential to disrupt nature. Would there be any potential build-up of ground gases and/or soil contamination from construction activity? What impacts, if any, on human health, could arise?</p> <p>General community disruption: This would test general effects on well-being; and what effects (if any) the construction of the route will have on communities, and whether or not this varies in different local authorities across the route?</p>	
3.9.3	Data sources	Sufficient desktop and survey data has been collected to inform the assessment as presented within Section 15.4 of Chapter 15 (Socio-economics, Recreation and Tourism) of the ES.	BBC position pending sight of the ES	Under discussion

ID	Matter	National Grid's Position	Basildon Borough Council's Position	Status
3.9.4	Assessment methodology	<p>The Scoping Opinion stated <i>“The ES should detail the criteria used to identify businesses likely to be affected and the Applicant should seek to agree these with relevant local authorities”</i>.</p> <p>A meeting was held on 14th November 2024 to seek to agree this point in the Scoping Opinion.</p> <p>A 3rd Technical Note is currently being prepared to seek to agree the study area and methodology.</p> <p>NG response to the Statutory Consultation response:</p> <p>A detailed assessment of the potential effect on the economy and employment within the Wider Study Area will be undertaken in the ES stage. However, a district or borough breakdown of direct and indirect employment generation will not be available. This is due to the fact that job uptake will be skills level dependent, as well as taking into account suitability. The potential employment opportunities for the Project would also serve a much wider scale, including short tenure and mobile employment. Therefore, it will be appropriate to assess the employment generation assessment in the Wider Study Area as a whole.</p>	<p>During the Thematic Group Meeting (August 2023), BBC requested the quantification of employment numbers to be generated on a borough by borough basis or at a local community level within the assessment.</p> <p>BBC statutory consultation response also reiterated the above stating that: <i>Failing to set out what the project will achieve in this respect appears to go against the heart of the LURA 2023 legislation, and, By this stage of the project, clear facts and figures about the opportunities N-T will create should really be available.</i></p> <p>Govt policy now expects community benefits information to be provided. The Council feels that information on job creation will help National Grid to demonstrate co-working with LPAs if a breakdown at local level can be provided.</p>	Under discussion
3.9.5	Key parameters and assumptions	Key parameters and assumptions associated with the Socio-economics, Recreation and Tourism assessment are summarised in Section 15.4 of Chapter 15	BBC position pending sight of the ES.	Under discussion
