

We have even had a video link with Fisher German experts asking these questions but the answer is always the same they don't know, you expect us to sign an agreement but we have no input into this agreement or indeed you are just stalling for time and keeping us in the dark. We are only a small farm but have been farming on this site since 1980. and if this project goes ahead as it will we will have to stop farming. We will have no choice

THE OWNERS

Rec'd 24/2/26

13. 2. 26.

I am writing to oppose this project.

To start with it will stop my fishing lake activity, make my cattle business non viable and my turkey business cancelled. We have had several meetings with Fisher German personal and asked questions about several options on plots but are given the answer that they don't know and will be in touch but you never get back to us.
