

INGATESTONE - ESSEX

These photos were taken over the last four weeks.

This is how bad the road is for several months, getting worse each year from each direction. The roads flood on Stock Road, Ingatestone Road and Buttsbury Road and of course the impassable Buttsbury Wash. The road surfaces are horrendous getting worse everyday. The river regularly busts its banks flooding the fields for miles. I fail to see how heavy trucks will access this area and be able to work effectively.

The countryside needs to be left alone, nature won't comply. At the very least it would go easier for your workers underground. It is a hazard and risk to your employees lives. Trees regularly fall throughout the year also. And as previously mentioned wildlife will suffer with pylons!
